MITSUBISHI MOTORS

ADVISORY HOTLINE FIX

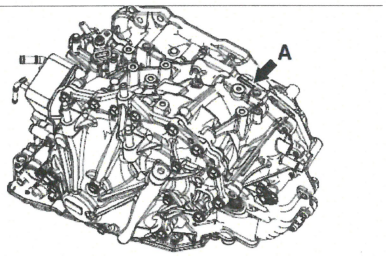

Group: 23 – CVT Transmission	**Original Date: 26/06/2017**	**No.** CF23-002, XB23-002, ZK23-003
Model: CF Lancer, XB ASX and ZK Outlander	**Subject: F1CJC/W1CJC CVT valve body calibration values (including accidental erasure).**	
Initial Issue	Yasuhiro Oda Deputy Director, Field Service.	
MMAL Ref N/A	**Document consists of 1 page**	

(1) **Subject:** F1CJC/W1CJC CVT valve body calibration values (including accidental erasure).

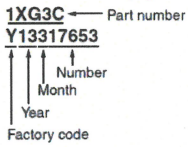

(2) **Information**: Since the introduction of the F1CJC and W1CJC transmissions, the "Learned Values" section of the CVT ECU refers to the stored calibration values of the CVT valve body. **These values must not be initialised in the CVT ECU during normal service**. If the CVT "Learned Values" are erased in situations other than those outlined in the WSM, erroneous operation of the CVT may occur and in the worst case scenario, the vehicle may not shift from the "P" range.

(3) **Improvement**: N/A.

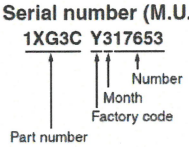

(4) **Field Fix/Action**: If the "Learned Values" are accidentally cleared from the CVT ECU or cannot be saved (due to ECU failure) and are not available to be re-written to the ECU, please submit a TSR including the serial number from the transmission to obtain the calibration file (refer below) –

Serial number (A)

Serial number (M.U.T.-III Display)

Once the calibration file is obtained, please refer to the "Learning Procedure" section of the applicable WSM for the calibration writing procedure.

(5) **Parts and Warranty Information**: Warranty is not applicable to this concern.

Disclaimer: *The fact that a Hotline Fix has been issued does not express or imply that Mitsubishi Motors will apply or has any obligations to apply any product improvement or field fix to a vehicle that is out of warranty.*

Note: This document should be forwarded direct to the Service Manager for action and distribution to all affected staff
