1st August 2023

Attention: Service Managers and Forepersons.
Subject: MMAL – 23021 XMS support for Getac F110 tablets outside of warranty period.

Dear Valued Business Partners,

The purpose of this letter is to advise of changes to XMS support for all Getac F110 Tablets that are beyond the 5 year warranty and support period.

XMS is a support platform provided by Bosch Automotive Services for both the F110 Tablet and S410 laptop units, providing software updates, workshop manuals and troubleshooting for any issues with this hardware.

As advised in General Letter MMAL – 22209, new diagnostic hardware (Getac S410 laptop) has been distributed to your Dealership and "Any existing F110 Getac tablet hardware outside of the 5 year support period may remain supported on the Bosch XMS platform for up to 3 years (TBC) at your Dealership's discretion*"

As each Getac unit covered by the XMS program is charged as part of your Dealership's monthly service charges (refer General Letter MMAL – 22113), MMAL are providing the option for Dealers to either "opt in" or "opt out" of XMS support for Getac F110 units that are out of the warranty and support period.

If you choose to opt in, the XMS support, MUTIII software and Clip software charges will be added to your monthly service charges until the cessation of XMS support for that unit (or until such time that you advise Bosch that you wish to cease XMS coverage for that unit). **Note:** Opting in does not extend the warranty of the unit. Repair charges for any hardware failures that occur will be the responsibility of the Dealer.

If you choose to opt out, that Getac F110 unit will no longer receive updates or support from Bosch or MMAL. The software on these units will time out and they will eventually cease to operate. Units that opt out of the XMS program must not be used for application of software updates once the choice to opt out has been made. Application of incorrect or outdated software by use of a unit that is no longer supported under the XMS platform, and any cost/damages incurred by such actions, will be the sole responsibility of the Dealer.

All Getac F110 units will soon be sent an update prompting for your Dealer code *Figure 1* page [2]. Once entered, the warranty coverage status of the unit will be shown *Figure 2* page [2]. To opt out, simply exit from all prompts and that unit will cease to be covered under the XMS program. To opt in, contact Bosch Automotive Service Solutions via the provided phone number/email (Ph: 1300 888 937, email: Support.aus@service-solutions.com) and a one-time password will be provided to enter into the dialogue box shown in *Figure 3* page [2]. Once entered and accepted, that Getac F110 unit will continue support on the XMS program as previously outlined.

If you have any questions regarding the process as outlined above, please contact MMAL via email techsupport@mmal.com.au
