1st September 2021

Attention: Dealer Principals, Sales Managers, Parts Managers and Service Managers
Subject: MMAL – 21160 Dashmate Dash Camera fitted RRP and cost price increases.

Dear Valued Business Partners,

MMAL advises that there will be an increase to the published RRP (Fitted) of our successful Dashmate Dash Camera range from 1st October 2021. As part of this RRP increase, there will also be a small increase in cost price, passed on from our vendor.

Following a market review, we are confident that the revised dash camera pricing together with our 5 year warranty will maintain a leading position in the market place.

Dash Camera Model and Description	**DSH-1052 DASH CAMERA KIT, SCREEN = 3.0 LED SCREEN MODEL**	**DSH-922 DASH CAMERA KIT, BARREL = BARREL MODEL**
MMAL Part #	**AU600030**	**AU600031**
Dealer cost increase 1st October Plus GST	**$54**	**$45**
Fitted RRP 1st October Inc GST	**$1,195**	**$995**
Product Warranty*	**5 years**	**5 years**

Notes:

- All orders placed this month will beat cost price increase, even if delivered in October2021.
- Price rises are effective from 1st October 2021 with summary shown in table below.
- MMAL website will show new customer RRP from 1st October 2021.
- Model range comparison is detailed in Appendix A
- Please see below and refer bulletins MMAL-21104 & MMAL-21128 for full details.

Reminder: As an MMAL purchased accessory, this Dash Camera Range counts toward Dealership accessory target achievement. Please refer MMAL website and eAPG for customer RRP fitted pricing. Dealer pricing available in SAP.

Should you have any questions regarding this program, please speak with your Area Sales Manager or Parts & Service Development Manager.

Best regards,

Shusaku Sato
Director - Aftersales

Recent updates and enhancements to our Dashmate Dash Camera program as advised in earlier bulletins MMAL-21104 & MMAL-21128 include:

- Reduced minimum order quantity (MOQ)
- Ability to mix and match within MOQ
- Deletion of camera only options
- Customer set up instructions
- Exclusive 5 year warranty*
- Updated fitting instructions
- Video demonstration display sales tool

Reduced minimum order quantity (MOQ): A reduction in the Minimum Order Quantity (MOQ) to just 3 x units per order (previously 5x units), with no change to price per unit in response to Dealer feedback.

Ability to mix and match within MOQ: Units can be any mix of models to achieve the 3 x minimum order quantity.

Deletion of camera only options: From today, we offer Dashmate camera kits including hard wire kit and 64GB SD card only, deleting camera only models from our range. This change is designed to maximise dealer labour sales through fitment of unit and offer customers a full 5 year warranty *on camera. Refer Appendix A.

Customer QR code set up instructions: Each Dashmate camera kit will include a "Before you start" document with QR code that allows customers to quickly set up and register their Dashmate camera. Refer Appendix B.

Exclusive 5 year warranty* Available when Dashmate purchased from MMAL and hard wire installed to any make or model of vehicle by dealership owned by that MMAL purchasing dealer group. If not installed by dealership, warranty reverts to standard 12 months. Warranty if required, is direct with vendor as explained in Appendix C.

Updated fitting instructions: Complete fitting instructions for all current MMAL vehicles are available on MMAL dealer portal.

Video LCD demonstration display: A limited number of countertop video demonstration units have been produced and due to arrive in mid-September. These are a great sales tool and we recommend for use in your customer lounge areas to create interest with service customers and in your new car showroom. These are available for purchase or free with each order of 9 units. Refer bulletin MMAL – 21128.

APPENDIX B: Customer QR code set up instructions

dashmate

BEFORE YOU START!

DSH-1052 / AU600030

Step 1:

Please download the compatible DSH-1052 "dashmate LINK" App by scanning the following QR Code.

Step 2:

Format your Micro SD card first via either your Dashcam (1) or the App (2) by following the steps below.

dashmate LINK

1. How to Format your Micro SD card via the DSH-1052 Dash Camera

Please format the Micro SD card by following the steps below using the DSH-1052:

1. Insert the Micro SD card in your Dashcam, ensuring it is inserted in the correct orientation.
2. Touch ■ to stop recording.
3. Touch ⚙ to enter General Settings.
4. Scroll left and right using the arrow keys.
5. Touch "Format" and confirm formatting by pressing OK

2. How to Format your Micro SD card via the Dashmate Link App

1. Insert the Micro SD card in your Dashcam, ensuring it is inserted in the correct orientation.
2. Please download and install the DSH-1052 "Dashmate LINK" App from the Google Play Store or Apple App Store depending on your mobile device.
3. In your mobile device WIFI settings search for DSH-1052-XXXX (the last 4 digit are unique to each dash camera) WIFI connection and connect it on your mobile device by entering password "12345678".
4. Open the dashmate LINK App and access the Settings menu. Press "Format SD card". The DSH-1052 will then format the Micro SD card.

dashmate

BEFORE YOU START!

DSH-922 / AU600031

Step 1:

Please download the compatible DSH-922 App by scanning the following QR Code.

Step 2:

Format your Micro SD card first by following the steps below.

DSH-922

1. How to Format your Micro SD card via the DSH-922 App

1. Insert the Micro SD card in your Dashcam, ensuring it is inserted in the correct orientation.
2. Please download and install the DSH-922 App from the Google Play Store or Apple App Store depending on your mobile device.
3. In your mobile device WIFI settings search for DSH-922 WIFI connection and connect it on your mobile device by entering password "12345678".
4. Open the DSH-922 App and access the Settings menu. Press "Format the SD card". The DSH-922 will then format the Micro SD card and will give you an audio notification once the Micro SD card has been formatted.
