Troubleshooting and concern report sheet – SDA1

VIN:
MMAL Part No:
Prior Refurbishments/Replacements (Provide RO Number/s):

Troubleshooting notes (to be checked/completed before unit replacement request):
If any issues are found, rectify and reassess before continuing this process.

Troubleshooting Checks	Completed		
	Y	N	N/A
Is the touch screen clean and free from damage?			
For Apple iPhones, is the customer's phone is up to date with the latest iOS software version. Note: Some iOS versions may experience instability with CarPlay, so please check for any issues on the Apple Support Community - https://discussions.apple.com/welcome			
For Android phones, is the customer's phone up to date with the latest software. Ensure that the latest version of Android Auto is installed on phone. Note: Some phone and software versions may experience instability with Android Auto, so please check for any issues through the relevant manufacturer support websites.			
Has the device been deleted (from the audio unit) and re-paired (especially after any phone software update has occurred)?			
For Apple iPhone - Is a genuine phone cable or a MFI (Made For IOS - or iPhone) certified cable being used (MFI cables have a data chip in to allow data transfer. Non MFI certified cables do not have a data chip and may not work correctly for data transfer)? Has another known good cable been tried?			
For Android devices - Is the cable used data transfer capable (again, some cables are designed for charging only)? Using the manufacturer supplied cable is preferred, but any cable with the correct connections, that is data certified, will be sufficient.			
When the phone or external device is connected via cable, is the phone plugged in prior to starting the vehicle? Note: If a phone is plugged in via cable after starting the vehicle, it may affect the operation/function of the audio unit.			
Are the USB port/s in the vehicle damage? If damage is noted, the ports should be repaired/replaced before continuing diagnosis.			
Is the customer's phone data/charging port clear of moisture, lint and debris?			
Is the audio unit or casing modified or damaged, or does the unit show signs of tampering?			
Are there any non-standard electrical cables or other electromagnetic/emitting devices in close proximity to the audio unit? If yes, please remove the items and reassess.			
Has the customer's phone been restarted periodically (to prevent connection and functionality issues that may occur due to phone system resource availability)?

Concern specifics:

Radio

- Station Fade ☐
- Sound Distortion ☐
- Interference ☐
- Reception ☐
- AM ☐
- FM ☐
- DAB ☐

Connectivity (Device/Phone)

- Constant Drop Out ☐
- No Connectivity ☐
- Error Message ☐

General

- Black Out ☐
- Touchscreen Unresponsive (constant) ☐
- Buttons Not Operational ☐
- No Power ☐
- Backlight ☐
- Display Error Code ☐

Problem Occurs Frequency*

- Always ☐
- Once ☐
- Occasionally ☐

Vehicle Conditions*

Engine

- Running ☐
- Not Running ☐
- Both ☐

Vehicle

- Moving ☐
- Not Moving ☐
- Both ☐

Area*

- Metro ☐
- Rural ☐
- Both ☐

Was Customer complaint verified* Yes ☐ No ☐

Fault diagnosis carried out: eg checked wiring, terminal condition and voltages.

*** Mandatory Fields**

Once the above troubleshooting steps and concern specifics above have been completed, log into MiDealer Assist and submit a case using the following information:

- Title – "MMAXXXXXXXXXXXXXXX" (ensure that the correct VIN is entered).
- Case Topic - "MiCare".
- Case Subtopic - "MiCare – 020220 Kenwood SDA1 to Alpine".

A

The following documents must be attached to the case:

- Copy of trouble shooting guide.
- Photo of the VIN.
- Photo of the audio unit screen.
- Evidence of the fault (video/s if possible).

Failure to follow or submit any of the required steps may result in the rejection of the case.
