WARRANTY INFORMATION SYSTEM (WIS 3)

Please find a copy of WIS Version 3 enclosed with this week's mail-out.
WIS 3 should be loaded as soon as possible to prevent Version 2 reaching its licence expiry date.

WIS 3 includes the long awaited Electronic Warranty Claim Submission System. It is expected that this system will replace the use of Click and Add. It provides a number of benefits which include :

- Quicker and easier claim submission,
- A database of claims which can be used for claim reconciliation, claim re-submission etc
- The ability to import data such as VIN's, LOTS times and Labour details directly into the claim form reducing errors and re-keying.

We are currently developing a training module for the use of this system, which we hope to begin to deliver in late May.
