WARRANTY INFORMATION BULLETIN

WIB 2005-12 29/09/2005

ATT: SERVICE MANAGER/WARRANTY ADMINISTRATORS

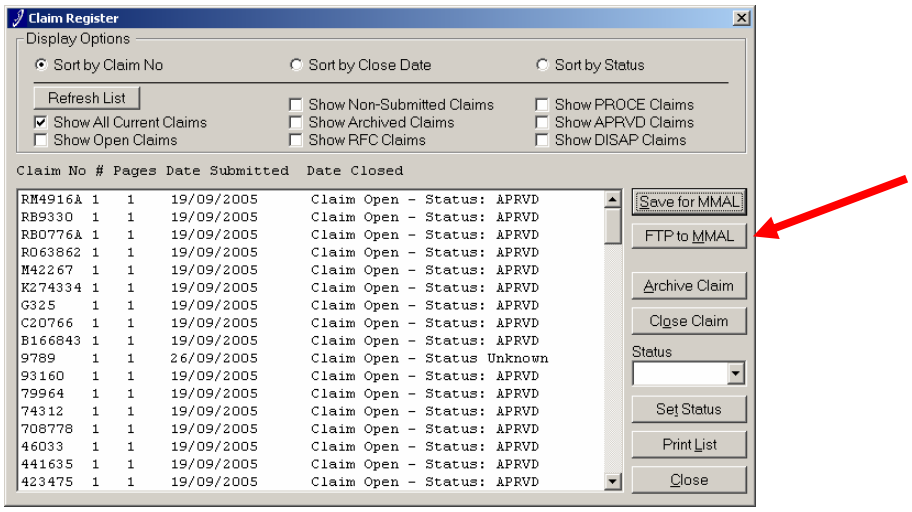

Warranty Information system (WIS) version 6.0

Included with this WIB is the latest version of the warranty information system on CD.
This updated version includes the labour times for the new 380 sedan and Lancer EVO IX. The newest version can be identified when updated by the picture of the red 380 VRX on the initial screen.

WHATS NEW

Claim submission

The claim form for the WIS has been updated. A new button (FTP to MMAL) has been added to the submit screen.

There will be a new FTP server coming online at MMAL very soon, which will allow this function to be used. This will eliminate the need to drag and drop into the web screen. The old system still works at this time but will be phased out in the not too distant future along with the Click and Add system.
Those who are still using Click and Add should familiarise themselves with entering claims through the WIS before this happens.

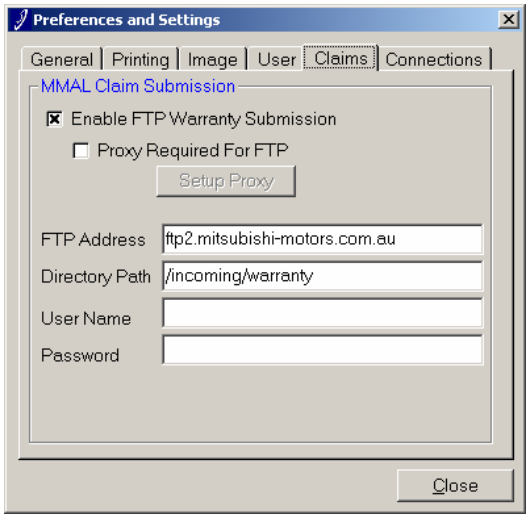

Training

With the pending change from Click and Add, dealers that still require training in the use of the WIS claim submission form should **e-mail** the warranty department on the e-mail address included on the bottom of this WIB so that we may determine our training schedule. Please use the heading "**WIS training**" in your e-mail.

To contact Warranty Payments Administration:
Telephone Warranty Hot Line: (08) 8275 2367
Fax: (08) 8275 2496
e-mail: mmal_warranty_admin@mmal.com.au
Address: 1284 South Road Clovelly Park SA 5042
PO Box 8 Melrose Park SA 5039

Preferences and settings

A new tab has been added to the preferences and settings screen in the WIS called “Claims”.

This tab is where the information necessary for the FTP function to work will need to be entered. **Do not** use your current user name and password. The information required will be sent out to each dealer shortly in a separate advice.

System Improvements

The new version of the WIS has had some improvements to the claim form functionality.

- When an Auxiliary operation is selected from the WIS by double clicking on the line, the Auxiliary code is entered correctly in the work code column.
- The system also reminds you to add a parent operation to the claim if you haven’t already when choosing an Auxiliary operation. This is the same functionality that was previously available when selecting Additional operations.
