Supply of Warranty Information System Disk – Version 6.0

In October 2005 MMAL mailed out a new 380 Service Launch kit to all dealers. Included in this kit was the updated version of the Warranty Information System disk (WIS disk version 6.0). At the same time the updated WIS disk was sent to all Parts and Service dealers.

Some dealers have contacted MMAL and Infomedia requesting that they require the updated version of the WIS disk. If the new version 6.0 WIS disk has not yet been installed please check the 380 Service Launch Kit sent to your dealership and install it immediately.

If version 6.0 of the WIS disk has not been installed at your dealership and the disk can not be located, please contact the Warranty department on (08) 8275 2367 and request the updated version to be mailed out.
