ATT: SERVICE MANAGER/WARRANTY ADMINISTRATORS

Changeover to new MMAL FTP server for upload of warranty claims

MMAL are upgrading some of their IS systems. As a result a new FTP server will replace the existing server. This requires the change of the submission path and process.

The old sever will be shut off on the 31st March 2006 and this date can not be extended.

The Click and Add system will no longer function after the 31st March 2006. Those still using Click and Add will have to familiarise themselves with the WIS before the 31st of March.

We strongly recommend that you changeover to the new server immediately so any technical difficulties can be sorted out before the change over date.
Currently there are a number of claim submission systems to MMAL. Included in this WIB are the new claim submission procedures for each of them

- Upload of claims using the WIS
- Upload of claims using DMS

1. Using the new sever with WIS

WIB 2005-12 explained that new user names and passwords would be sent out shortly. Included with the status report dated the 7th March 2006 is a unique user name and password for each dealer.

Set-Up - This must be done before submitting claims

1. Open the Warranty Information System from your desktop.
2. Click 'File' from the upper toolbar and then click 'Preferences and Settings'. In the 'General' tab setting load your dealership's warranty and retail labour rates. Click on the 'User' tab and load your dealership's details. Click on the 'Claims' tab and enter the dealership's username and password. The username will be the dealership's dealer code. The username and password are case sensitive. Note: This step is only required for the initial set-up or if any changes are required. More details can be found on how to set-up Dealer details by clicking on to the 'Help' button from the upper menu bar, then 'Warranty Procedures', then 'Warranty Procedures Tutorial'.

To contact Warranty Payments Administration:
Telephone Warranty Hot Line: (08) 8275 2367
Fax: (08) 8275 2496
e-mail: mmal_warranty_admin@mmal.com.au
Address: 1284 South Road Clovelly Park SA 5042
PO Box 8 Melrose Park SA 5039

Sending a Claim

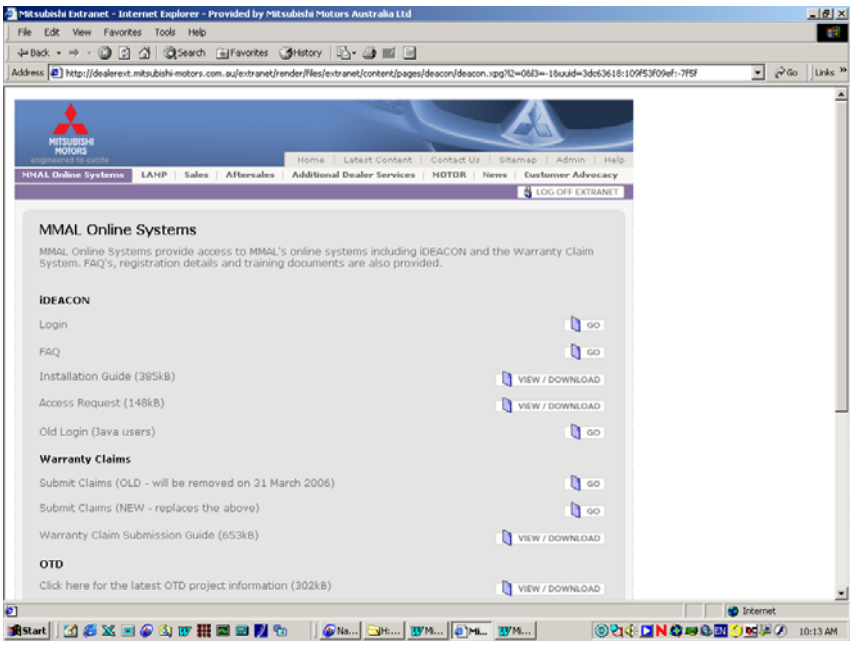

3. Click the ‘Claim’ button from the lower toolbar or the ‘File’ button on the upper toolbar, then ‘Claim Form’ and an electronic claim form will appear.
4. Input the warranty claim details as required using the dropdown boxes and other boxes to enter the mandatory data in to the mandatory fields. The bold lettering next to each box shows the mandatory fields. More details can be found on how to create a warranty claim by clicking on to the ‘Help’ button from the upper menu bar, then ‘Warranty Procedures’, then ‘Warranty Procedures Tutorial’.
5. On completion of entering the data on to the claim form, click on the ‘Save’ button located at the top of the claim form. Notification will be given to say that the claim has been saved. Repeat steps 4 and 5 for each claim that is to be entered.
6. Before entering the data for the next claim, click the ‘Clear All’ button at the top of the claim form and ALL the previous data will be removed from the claim form ready for entering the new data. If the next claim to be entered is on the same vehicle as the previous claim, then click the ‘Clear’ button and the vehicle details will be retained but all other data will be removed.
7. When all claims have been entered and then saved, click on to the ‘Submit’ button ready to transfer the claims to MMAL. A claim register will appear showing all the claims that have been entered and saved, and the status of those claims. The claim register can be used by dealers to track the status of their claims.
8. To submit the claims to MMAL, dealers should click on to the box ‘Show Non-Submitted Claims’ and then click the ‘Refresh List’ button. This will show all of the non-submitted claims. Then click, hold and drag down the page to highlight all of the claims to be submitted to MMAL (Alternatively, other standard Windows selection methods may be used). When satisfied that all claims to be submitted are highlighted, then click the button ‘Save for MMAL’ located on the right hand side of the page. Claims have now been saved in a directory ready to be transferred to MMAL. Then click the button ‘FTP to MMAL’. The claims have now been transferred to MMAL ready for judgement.
9. **Note: Dealers using the current version of the Warranty Information System to submit warranty claims can only submit one batch of claims per day. If more than one submission is made, then the last submission will overwrite the previous submission.**
10. After the judgement process is complete, dealers can use the Claim Register to update the status of their claims, close claims when they have been paid and archive old claims that are no longer required. Each claim will need to be highlighted individually and then click on the appropriate button for the status required.

2a. Upload of claims using DMS (Batch submission with indirect download)

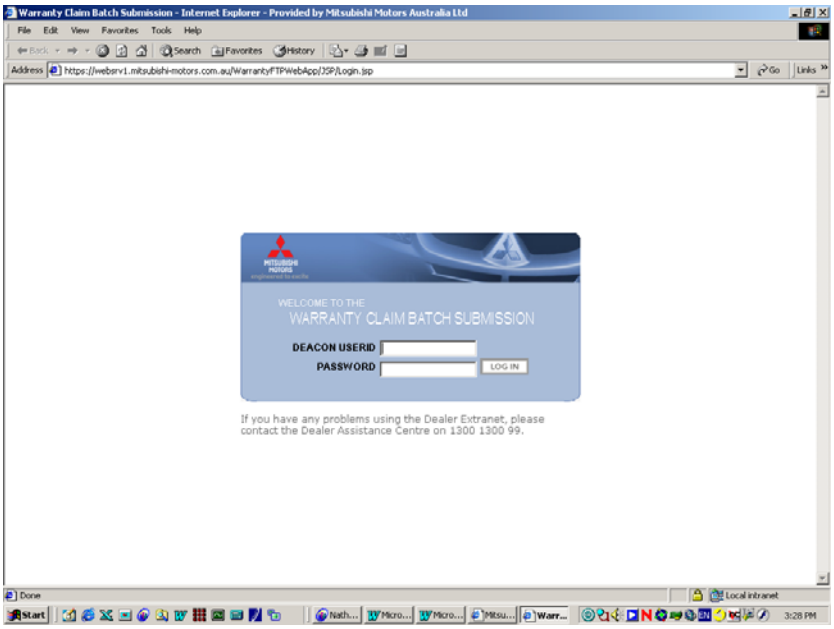

The upload of warranty claims using a DMS will be very similar to previously. It is explained in the pages below. The main difference is the link to use from the MMAL Online systems Menu. Use the Submit Claims (New – replaces the above) link under the Warranty Claims heading.

1. Load warranty claims using the DMS and then create and save the claims to a file.
2. Log on to the dealer extranet, and then click the tab ‘MMAL Online Systems’.

3. Scroll down to the heading 'Warranty Claims', click on 'Submit Claims (New – replaces the above)'.

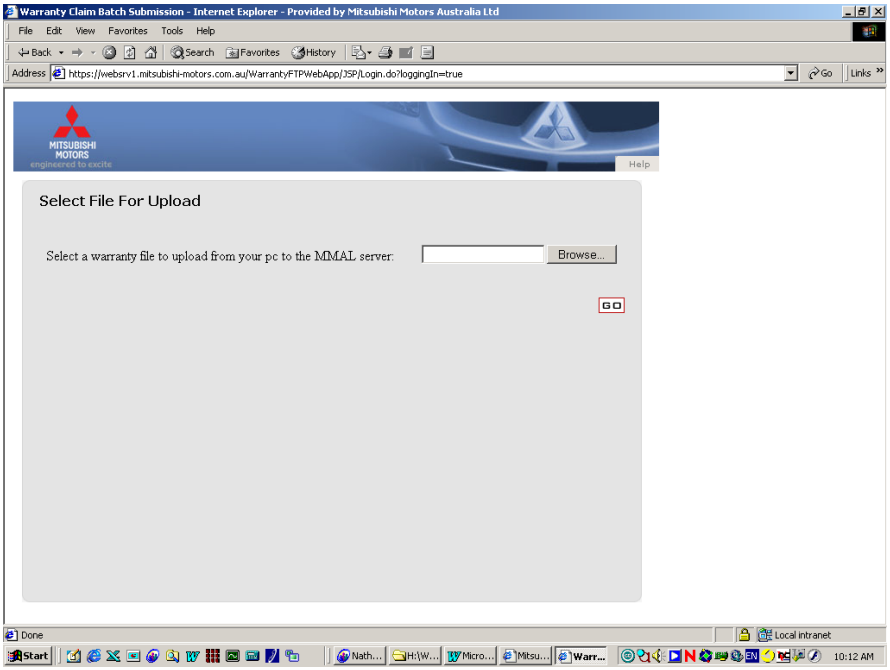

4. Enter your Deacon UserID and password and hit enter or click the 'Log In' button.

To contact Warranty Payments Administration:

Telephone Warranty Hot Line:	(08) 8275 2367	**e-mail:**	mmal_warranty_admin@mmal.com.au
Fax:	(08) 8275 2496	**Address:**	1284 South Road Clovelly Park SA 5042 PO Box 8 Melrose Park SA 5039

5. The ‘Select File for Upload’ screen will appear. This enables you to select the file, to which the warranty claims have been saved to, for upload to the MMAL warranty system.
6. Click the ‘Browse’ button and a ‘Choose File’ dialog box will open. Use this to select the warranty file you are going to upload to the MMAL server.

7. After selecting the file, click the ‘Go’ button to begin the transfer. Note: An error message will appear if the size of the file being transferred is greater than 200KB.

When complete, a message will appear advising that the file was successfully uploaded to the server. If an error occurred with the transfer, a message will be displayed explaining what the problem was.

2b. Upload of claims using DMS (Batch submission with direct download)

Some DMS providers are looking at providing a button that will submit the warranty claims to MMAL directly. The process is detailed below.

1. Load warranty claims using the DMS and then create and save the claims to a file.
2. Click the button on the DMS that will submit the Warranty claims to MMAL’s server.
3. Multiple batch claims can be made each day providing the file name that the claims are saved to is different each time.
4. If difficulties are experienced transferring claims to MMAL’s server, please contact your DMS provider.
