ATT: SERVICE MANAGER/WARRANTY ADMINISTRATORS

Warranty Information System (WIS) Claim Submission

This is a reminder to all warranty clerks that when submitting warranty claims via the WIS that only 1 claim submission file per day is permitted. If more than 1 file is transferred per day, then the last file transferred will be the file that is uploaded. Be careful when submitting warranty claim files at the end of day. If files are transferred late in the day, they may not be included with that day's processing. This means that the claims will be held over and processed on the next working day. If on the next working day a new claim submission file is sent (with new data), the new file will over write the previous file that missed the cut-off the day before. This will mean that all of those claims from the previous day will not be entered on to the warranty system.

No Failed Part (NFP) on WIS claim submissions

Please note that when submitting warranty claims via the WIS and entering NFP in the parts, the amount section must be entered as 0.00. If the amount is not entered in to this field in this format, this will cause a critical error to occur with your claim and the claim will not be loaded on to the warranty system.

Warranty Claim Numbers entered on to the WIS

Dealers that use the WIS to enter their warranty claims are advised that when the warranty claim number is entered in to the claim form that if a suffix or hash number is not also entered, the system will automatically apply a suffix 1 to the claim. This is the box next to the sequence number on the claim form that is marked #.

When the claim is loaded on to the warranty system, the suffix or hash number is applied, so dealers will need to enter this as well when they search for the claim on the warranty system.

Warranty Repairs

When dealers are rectifying a warranty problem on a vehicle, please explore all possibilities for repair before replacing the part. Dealers are reminded that the vehicle should be repaired or the part replaced which ever is the cheapest possible option.

Reporting of Critical Errors

The medium of reporting critical errors to dealers will be changed shortly. Currently, the warranty department sends a fax of the critical error report to the dealership and highlights where the error occurred.

To contact Warranty Payments Administration:
Telephone Warranty Hot Line: (08) 8275 2367
Fax: (08) 8275 2496
e-mail: mmal_warranty_admin@mmal.com.au
Address: 1284 South Road Clovelly Park SA 5042
PO Box 8 Melrose Park SA 5039

The procedure of highlighting on the critical error report where the error occurred will not be changed, but then an email will be sent to the dealership with the attached critical error report. The critical error report will be scanned as a pdf document and then emailed to the dealership's service manager. The email will be addressed from "MMAL" and will have the subject "Attached Image".

Dealerships must have Adobe Acrobat version 6 or version 7 installed to view the attachment.
