ATT: SERVICE MANAGER/WARRANTY ADMINISTRATORS

Warranty Information System (WIS) Disks – Version 7.0

Please be advised that enclosed with this fortnight's 'Recipient Created Tax Invoices' and disposition lists (payment period ending 16th May 2006), there is a copy of the latest version of the WIS disk.

Dealers are advised to load the new version of the WIS disk on to their computer as soon as they receive the disk to avoid the WIS timing out.

Changes and Updates Included in WIS Version 7.0

- The addition of the new ML Triton. A screen shot of the new model appears on the opening page of vehicles covered under warranty screen. All times for this new model are available on the WIS.
- The QA Pajero screen shot has been moved to the screen of models used for parts warranty.
- The VIN search feature has been corrected and is now available.
- Times for all recall and service campaigns are available up to the time of the WIS being produced.
- Some times for 380 were previously missing and these have now been added.
- Multiple daily file uploads via the WIS are now available.

WIS – Frequently Asked Questions

Attached to this bulletin is a document that has been produced by MMAL's Information Systems department in relation to the WIS disk. The attachment is a document that outlines frequently asked questions about the MMAL warranty claims electronic lodgement process.

Dealers are encouraged to read the document and to refer to the document to trouble shoot any problems they are having lodging warranty claims before contacting MMAL.

It is advisable for dealers that are having problems with lodging their warranty claims to firstly speak to their local IT person before contacting MMAL. If after speaking with the IT person the problem can not be resolved, then contact the following:

If it is a file transfer problem – contact MMAL Help Desk on (08) 8275 7081
If it is an installation or operation problem – contact Infomedia on 1800 810 103

To contact Warranty Payments Administration:
Telephone Warranty Hot Line: (08) 8275 2367
Fax: (08) 8275 2496
e-mail: mmal_warranty_admin@mmal.com.au
Address: 1284 South Road Clovelly Park SA 5042
PO Box 8 Melrose Park SA 5039

If it is a problem with data for a warranty claim – contact MMAL Warranty on (08) 8275 2367

Quality Information Codes

Dealers are reminded that the diagnosis quality coding (the A code) of their warranty claim, should NOT have a code that is prefixed with a 'P' unless it is for a paint or body repair.

The table shown below is a list of 'A' codes that can be used ONLY for paint and body repairs. If the repair is for something other than paint or body, then use an alternative code that best defines the diagnosis.

Quality coding is an important part of the warranty claim as the data collected is used to forecast trends and highlight possible future failures that can be reduced through design changes. If the data entered on to the warranty claim is not accurate, decisions made using the data may not correct the actual problem.

USE FOR PAINT AND BODY REPAIRS

PA	PRIMER DEFECT
PB	THIN PAINT
PC	SEEDING
PD	RUNS
PE	SCRATCH
PF	FOREIGN MATERIAL
PG	DISCOLORATION
PH	FADING
PJ	UNEVEN
PK	BLISTERED
PL	RUST SPOT
PN	PERFORATION
PP	RUST (HEM/JOINT)

PQ	RUST CONTACT
PR	COLOR MATCHING
PS	ORANGE PEEL
PT	PEELING
PX	OTHER PAINT DEFECT
P2	BUFF MARKS, MARRING, POLISHING MARKS
P3	CHIPPED
P4	OVERSPRAY
P5	SCUFFED, RUB MARKS
P6	LOW GLOSS
P7	SEALER DEFECT (UNDER PAINT)
P8	POOR MASKING, RAISED EDGE

Mitsubishi WIS Software

Do I Have to use the Mitsubishi WIS Software?

No.

Some dealers prefer to run their own systems to keep track of warranty claims.

If the alternative system supports upload of claims via FTP then it can be configured with the dealer's FTP username and password and automated uploads will be possible.

If not, a manual process must be used to export claim information from the system. This claim can then be uploaded to MMAL via the Dealer Extranet or via another FTP client to ftp2.mitsubishi-motors.com.au.

What is Needed to run the Mitsubishi WIS Software?

To run the Mitsubishi WIS software you need the following :-

PC running Windows 2000, XP or later.
Working Internet connection with the ability to initiate outbound FTP transfers.
A dealer warranty e-Mail address in DEACON.

MMAL does not recommend the use of Windows 95, 98 or ME for running Mitsubishi WIS.

How Can I Check that my Internet Connection Works?

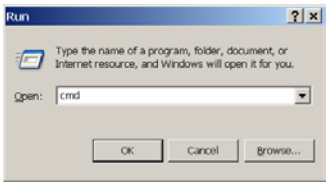

To check that your PC has a working FTP connection to MMAL, you can create a small file and manually upload it to the MMAL Warranty FTP Server by following these steps.

Step 1 - Create Test File

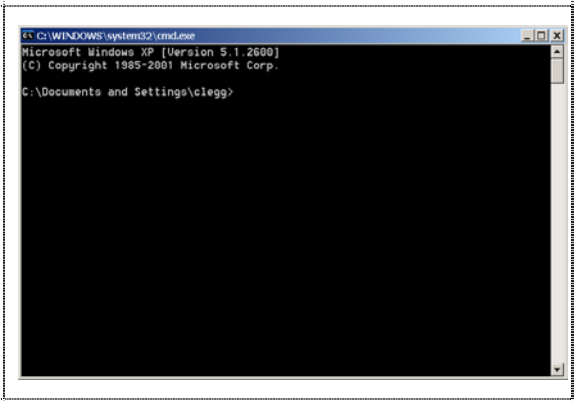

Click the "Start" button, then select "Run…". Into the box that appears, type

```
cmd
```

and then click "OK".

A window similar to that shown on the right will then appear.

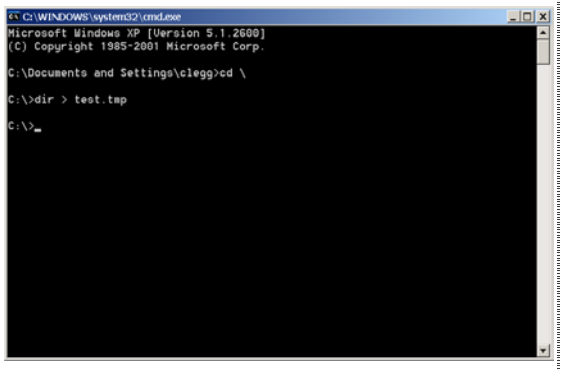

Into this window, type :-

```
cd  \
dir  >  test.tmp
```

pressing ENTER after each line.

The screen should look similar to that shown on the right.

This creates a file on your C: drive called "TEST.TMP". It is this file that you will attempt to upload to MMAL.

Before you start on Step 2, be sure to have your MMAL Warranty FTP username and password available, as you will need these to continue.

Also be aware that for security reasons, the "put" in step 3 that follows must be completed within two minutes of receiving the "logged on" message in step 2.

To contact Warranty Payments Administration:

Telephone Warranty Hot Line: (08) 8275 2367
Fax: (08) 8275 2496
E-mail: mmal_warranty_admin@mmal.com.au
Address: 1284 South Road Clovelly Park SA 5042
PO Box 8 Melrose Park SA 5039

Step 2 - Connecting to the MMAL Warranty Server

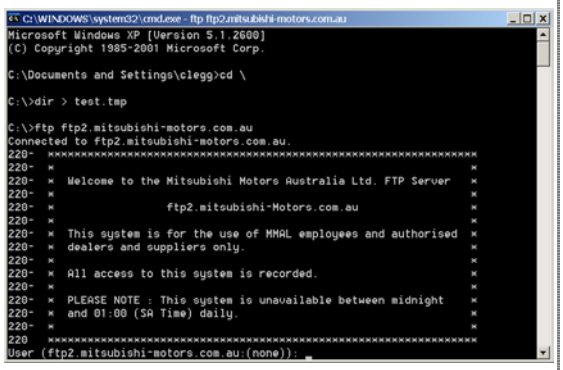

Type :-

```
ftp  ftp2.mitsubishi-motors.com.au
```

and press ENTER.

The screen should look similar to that shown on the right.

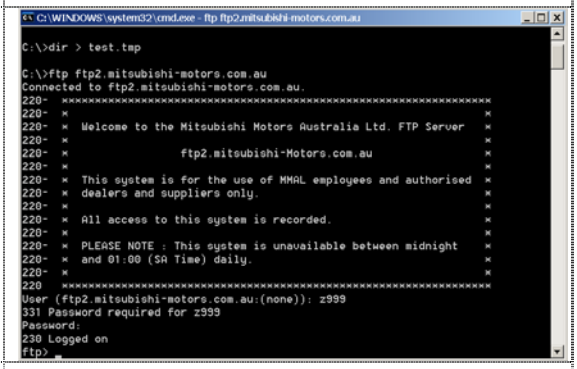

If not, please ask your local IT support person to check that your machine has a working DNS setting and is able to make outbound FTP connections.

Type your username, then press ENTER, then type in your password and press ENTER.

Note that you will not see the password as you type it.

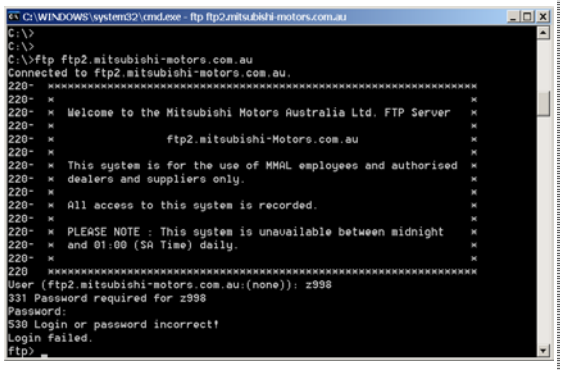

If you login successfully, your screen will look similar to that shown on the right. Note that the bottom of the screen shows "230 Logged on". This indicates that you have successfully connected to the MMAL FTP server. If you see this, go on to Step 3 below.

If you mistype your username or password, the screen will look similar to that shown on the right.

Note the "530 Login or password incorrect!" message. If you get this, you will need to type "quit", then try this entire step again.

Passwords are case sensitive, so if your password contains upper and lower case letters then it must be typed with the correct upper and lowercase letters.

Step 3 - Transfer the Test File

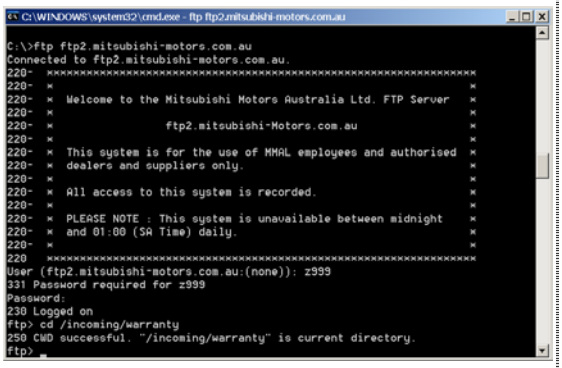

Type

```
cd  /incoming/warranty
```

then press ENTER.

The screen should report "250 CWD successful", as per that shown on the right.

If not, try again, being sure to check that it is typed as shown.

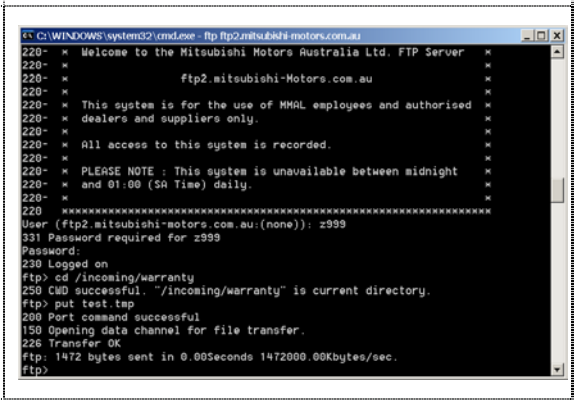

Type

```
put  test.tmp
```

and press ENTER.

If the transfer is successful, you will see "226 Transfer OK", as in the screen on the right.

If so, warranty uploads to MMAL are working correctly from your system and you should be able to use WIS successfully.

If you see a message that says "Connection closed by remote host" or anything else other than the "226 Transfer OK" message then your PC is not able to upload files to the MMAL Warranty FTP Server, even though it can make a connection to it. This is most commonly a local firewall problem that can only be resolved by your local IT person.

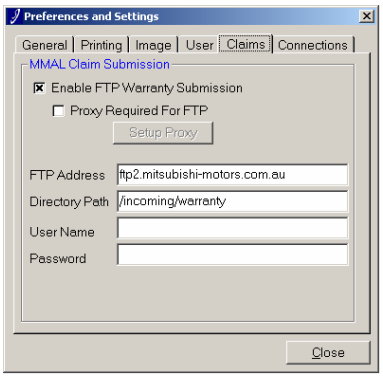

How do I Configure Mitsubishi WIS for FTP Transfers?

Start WIS, then select File -> Preferences and Settings -> Claims.

Check that the "FTP Address" and "Directory Path" fields are set as shown.

Enter your dealer code into the "User Name" field and the password that you have been given into the "Password" field, then click the "close" button.

Please check with your local IT support person to determine if you need to click the "Proxy Required for FTP" button.

How do I Send Warranty Claims to MMAL?

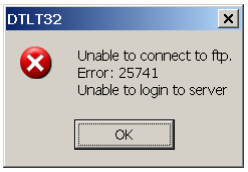

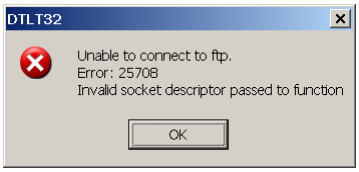

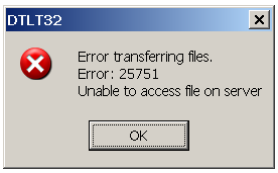

Step 1 - Enter the claims in the Mitsubishi WIS.
Step 2 - Select the claims you want to upload and then select "Save for MMAL".
Step 3 - Select "FTP to MMAL".

To contact Warranty Payments Administration:

Telephone Warranty Hot Line: (08) 8275 2367
Fax: (08) 8275 2496
E-mail: mmal_warranty_admin@mmal.com.au
Address: 1284 South Road Clovelly Park SA 5042
PO Box 8 Melrose Park SA 5039

I get an Error When I Select "FTP to MMAL"

If WIS is unable to upload your warranty claim file to the MMAL Warranty FTP Server you will receive one of the following error boxes.

If You See This…	Then…
	The WIS software was not able to find a copy of the local saved file to upload to MMAL. Be sure to click "Save for MMAL" before clicking "FTP to MMAL".
	Your username and/or password have not been correctly entered. Check that your username and password are entered correctly under File -> Preferences and Settings -> Claims.
	The server name has been entered incorrectly, or your PC cannot access the FTP server across your network. Check that the server name is "ftp2.mitsubishi-motors.com.au" under File -> Preferences and Settings -> Claims. Also refer to "How can I Check that my Internet Connection Works?" above.
	WIS was able to connect to the MMAL Warranty FTP Server but was unable to upload the file. Check that the directory path is set to "/incoming/warranty" under File -> Preferences and Settings -> Claims.

Can I Upload Claims more than Once a Day Using WIS?

Yes.

As of the April 2006 version (7.0) of the Mitsubishi WIS you can upload more than one set of claims per day.

If you upload a claim that you have previously uploaded that same day, the latter claim will take precedence over the earlier claim.

Can I Delete Uploaded Claims Before They are Processed?

Yes, though this cannot be done using WIS.

To delete an uploaded claim file, use an FTP client program to connect to ftp2.mitsubishi-motors.com.au with your WIS username and password, then go into the /incoming/warranty directory and delete the uploaded claim file.

Please contact your IT support person for more information on how to do this.

I Sent Multiple Claims via WIS but only ONE has been Processed

Check that you have selected all of the claims in WIS that you want to upload before you click "Save for MMAL". The "Save for MMAL" button only saves the currently highlighted claim or claims - it does not save all of the claims in the list.

To contact Warranty Payments Administration:
Telephone Warranty Hot Line: (08) 8275 2367
Fax: (08) 8275 2496
e-mail: mmal_warranty_admin@mmal.com.au
Address: 1284 South Road Clovelly Park SA 5042
PO Box 8 Melrose Park SA 5039

Other DMS/Warranty Systems

How do I Generate Claims for MMAL Using Our DMS?

Step 1 - Enter the warranty claims into your system.

Step 2 - Generate a claim file from your system.

Step 3 - Transfer the claim file from your system to the MMAL Warranty FTP Server.

How do I Transfer the Claim File to MMAL From Our DMS?

Please contact your local IT support person for further information, providing them with your MMAL Warranty FTP Server username and password.

They should then be able to set up an FTP transfer process between your DMS and ftp2.mitsubishi-motors.com.au.

The wide variety of other Dealer Management Systems precludes MMAL being able to assist with any one system's configuration.

What if Our DMS Does Not Support FTP Transfers

Please ask your local IT support person for alternative transfer methods, such as stand-alone FTP clients.

Alternatively, you can use the MMAL Dealer Extranet to submit any warranty claim file via a web page.

Can I do Multiple Uploads in the Same Day via the Dealer Extranet?

Yes.

Each upload that you perform via the Dealer Extranet is assigned its own filename on the MMAL Warranty FTP Server. This means that you can use the Dealer Extranet to perform multiple uploads of claim files in a single day.

If you upload a claim that you have previously uploaded that same day, the latter claim will take precedence over the earlier claim.

Can I Delete Uploaded Claims Before They are Processed?

Yes, though you cannot do this through the Dealer Extranet.

It will be necessary for you to use an FTP client program to connect to ftp2.mitsubishi-motors.com.au, provide your WIS username and password, then go into the /incoming/warranty directory and delete the uploaded claim file.

Please contact your IT support person for more information on how to do this.

General Questions

What is the Daily Cut-off Time for Uploaded Warranty Claims?

Warranty claims are transferred from the MMAL Warranty FTP Server to the MMAL mainframe for processing in DEACON at 6:30 pm local SA time.

Daily local cut-off times for uploaded warranty files are :-

- 7:00 pm in NSW, ACT and Victoria,
- 6:30 pm in Broken Hill,
- 7:00 pm in Queensland when DST is not in effect in SA,
- 6:00 pm in Queensland when DST is in effect in SA,
- 7:00 pm in Tasmania, except when DST is in effect in Tasmania only, in which case cut-off time is 6:00 pm,
- 6:30 pm in Northern Territory when DST is not in effect in SA,
- 5:30 pm in Northern Territory when DST is in effect in SA,
- 5:00 pm in WA when DST is not in effect in SA, and
- 4:00 pm local time in WA when DST is in effect in SA.

Claims received before this time will be processed that evening, with updates available on DEACON the following morning.

Claims received after this time will be processed in the evening of the following day.

I Sent Claims to MMAL but only SOME have been Processed

Check to see if you have received any claim rejection or critical error notifications for claims that were duplicates or contained invalid information.

Any claims that are processed that are found to contain invalid information are stopped by MMAL and notification of the failure is generally emailed to the dealer contact within one business day. Be sure that your warranty e-Mail address is correctly specified in DEACON.

I Sent Claims to MMAL but NONE of them have been Processed

Check that you have a working Internet connection, as per the above details.

If you are using WIS, ensure that you have specified your dealership details correctly. Note that dealer information is stored with a claim when it is entered, so if you do not have dealer information configured in WIS when you generate a claim that claim will NEVER have a correct dealer code assigned to it and will thus never be processed, even if it is uploaded successfully to MMAL. In such situations, the claim needs to be re-entered AFTER you have ensured that the dealer information is correctly set.

If you are using an alternative DMS, ensure that the dealer code is being correctly inserted into each claim file. Check also that the warranty file that your DMS system generates and transfers to the MMAL Warranty FTP Server has a ".TXT" extension.
