Suffix Numbers on Warranty Claims and Prior Work Authorities

Please be reminded that warranty claims submitted via the WIS (Warranty Information System) have a suffix or job number (#) automatically appended to the warranty claim sequence number if an alpha or numeric character is not entered when the claim is submitted. The system will automatically append the suffix '1' to claims that don't have a suffix entered when submitted.

When dealers are submitting a prior work authority (also known as a SCA), it is important that the correct claim information is submitted. When submitting the prior work authority, the suffix field (#) is a mandatory field and will require either an alpha or numeric character to be entered. Please ensure that the suffix field is entered and all claim information entered on the prior work authority is exactly the same as the warranty claim information. Failure to do this will result in a delay in the payment of the warranty claim.
