Repairs to Reversing Sensors

It has come to our attention that some dealers are claiming the entire reversing sensor kit when presented with a fault to the unit.

The reversing sensor kit is available as separate components (refer group 54 for Original Equipment fitment or the accessories section on Part Finder) that can be used to rectify the fault that is presented. Where possible dealers should replace faulty components and not replace the entire kit.

Where a kit needs to be used, comments should be included to support the claim.

In future, any warranty claims that have the entire kit replaced where a replacement part should be used, may not be paid at full cost.
