Warranty Information Systems Disk – Version 7.0 and Version 8.0

Please be advised that the current version of the Warranty Information Systems Disk – version 7.0, will time out after the 19th of December 2006. The next version of the Warranty Information Systems Disk – version 8.0 will be issued to dealers around this time. Therefore, version 7.0 of the Warranty Information Systems Disk may time out prior to dealers receiving version 8.0.

Dealers have two options if the version 7.0 disk expires prior to receiving the new disk.

1. Dealers can wait until the new version of the disk arrives in the mail and then load this on to their system. (It is expected that the new version of the disk will be received by week ending 22/12/06).
2. Dealers can contact Infomedia on 1800 810 103, who will assist dealers to download and install a file that will extend the life of version 7.0 until the new version 8.0 disk is received and installed.

MMAL apologises for inconvenience that this may cause to dealers.

Ian K. Matthews
Manager, Warranty
Aftersales, Sales & Marketing
