Warranty Claims for Vehicles with Manufacturers Extended Warranty

If a warranty claim is required to be made on a vehicle that has a manufacturers extended warranty, MMAL requires additional comments to be attached to the claim.

Vehicles with extended manufacturers warranty can be identified with an 'E' in the warranty index. For example, the warranty index L60E30.

The additional comments that MUST be included on the warranty claim shows that the dealer has checked the service history of the vehicle. Therefore, dealers must confirm that this is the case before performing any warranty repairs.

Failure to adhere to this requirement may result in a warranty claim not being paid or reversed at a later date. The claim must also meet audit requirements and could be reversed at audit if this procedure is not followed.
