Missing or Damaged Parts on Vehicles Received at Dealerships

In an effort to dispel some misconceptions related to parts damaged, faulty or not fitted to vehicles, where the fitment is part of the normal manufacturing process or the build up process carried out at Port of Entry (POE), the following guidelines should be followed:

- If a part is missing, and there is no evidence that it was ever fitted, the part should be ordered via normal parts channels and claimed through the warranty system as an Arrival claim (claim type 'A'), with the Diagnosis code 46 – Part not installed or missing.
- If a part has been damaged during fitment, or during the fitment of an associated part or accessory, the vehicle should be repaired as an Arrival claim (claim type 'A'), not as a Warranty claim (claim type 'W'). An SCA may be required in line with normal repair guidelines.
- If a part fitted to a vehicle is found to be faulty, the vehicle should be repaired as a normal Warranty claim (claim type 'W'). An SCA may be required in line with normal repair guidelines.
- Damage considered to be caused by vehicle movement to the dealership should be claimed as an Arrival claim (claim type 'A').
- Invoices should NOT be sent to regional offices for missing or damaged parts on vehicles received at dealerships. In all circumstances a claim should be sent to the warranty department with the correct claim type in line with what is mentioned above. Invoices sent to regional offices will be returned unpaid.

It should also be mentioned that missing or damaged parts must be listed on the E-Pod/VSR when the vehicle is received at the dealership.

Failure to adhere to the above requirements may result in a warranty claim not being paid, or reversed at a later date. The claim must also meet audit requirements and could be reversed at audit if this procedure is not followed.
