Warranty Claim Format for Multi Part Claims

This bulletin is to remind dealers about how the numbering format of a multi part warranty claim should be submitted. A multi part claim is a claim that has more than one suffix.

The warranty claim number can be made up of numbers, letters or a combination of numbers and letters. The suffix on a claim can be either a number or a letter. When a multi part claim is submitted, the warranty claim number must be the same for all parts of the claim and only the suffix should be different to distinguish the different jobs that have been performed.

An example of an unacceptable warranty claim number for a multi part claim is shown as follows:
12345A #1
12345B #1
12345C #1
In this example, the claim number should always be 12345 and each job should be given a different suffix to distinguish each job. The claim should be submitted as follows:
12345 #1 or 12345 #A
12345 #2 or 12345 #B
12345 #3 or 12345 #C

By adding an A, B and C to the end of the claim number in the example above, a new claim number is created each time. Claims submitted in this format in the future may be returned for correction and resubmission.

Failure to adhere to the above requirements may result in a claim not being paid, or reversed at a later date. The claim must also meet audit requirements and could be reversed at audit if this procedure is not followed.
