MMAL Warranty Tags

Warranty tags used for tagging failed warranty parts are now available for order through the MMAL extranet via the LAMP site.

Please be advised that effective from Monday August 3rd 2009 ALL warranty parts MUST have a warranty tag affixed to the failed part. The tag MUST be completed in full with all relevant information documented on the tag. As previously advised all tagged parts MUST be clean and free from any oils, grease or lubricants and boxed in the packaging of the replacement part.

Dealers can order the warranty tags through LAMP using the part number PAM596. There is no charge for the purchasing of the warranty tags, but a restriction on the number of tags ordered may be put in place depending on the number of warranty claims performed by a dealer each year.

Parts returned to MMAL without a warranty tag affixed to the failed part and not clean and boxed using the packaging of the replacement part, may result in the warranty claim being denied or reversed.

Warranty parts must be tagged and stored in a separate store away from P&A parts. Warranty parts will be audited as part of the dealer audit process, so it is important for these parts to be kept in a clean environment that allows warranty parts to be easily identified. The warranty claim must also meet audit requirements and could be reversed at audit if this procedure is not followed.
