Clearing Diagnostic Codes and Resetting

In conjunction with the MMAL Service Procedure manual, section 20.2.11, MMAL Warranty would like to advise the correct procedure for claiming when a diagnostic code has been cleared and reset and no fault with the system involved has been identified.

NOTE: If a fault with the system is identified and repaired, then the operation below can not be claimed.

The labour position code to use for this procedure is FANTOM with a work code of 10 and a maximum labour time of 0.4 hours. This time includes workshop allowance and must be supported by a clocking record. An example of what the labour line should look like in the warranty system is as shown below:

Page No	Line Id.	Position Code	Work Code	Aux. Code	Units	Calc Opn Time	Ratio Code	Value
01	LA	FANTOM	10		1	.0		????

Where ???? = the dealer's warranty labour rate multiplied by 0.4(max)

The cause part for this type of warranty claim must be NFP and no other parts other than NFP should be used in the parts list of the warranty claim.

Do not use FANTOM as the Quality Position Code. The Quality Information should best reflect the customer complaint and technicians diagnosis. Ensure the appropriate Position code and Diagnosis, Complaint and Circumstance codes (A, B, C codes) are recorded. The diagnostic code(s) cleared must be entered in the Remarks section of the claim.

To contact Warranty Payments Administration:
Warranty Telephone: (08) 8275 2367
Fax: (08) 8275 2496
e-mail: warrantyadmin@mmal.com.au
mmal_warranty_admin@mmal.com.au
Address: 1284 South Road Clovelly Park SA 5042
PO Box 8 Melrose Park SA 5039

Failure to adhere to the above requirements may result in a claim not being paid or reversed at a later date. The claim must also meet audit requirements and could be reversed at audit if this procedure is not followed.

Ian K. Matthews
Manager, Warranty
Corporate Quality
