This Manual is provided on loan from MMAL to you pursuant to your Customer First Franchise Agreement (clause 6.5.4) or Franchise Agreement (clause 6.10.4). You must not copy any part or all of the Manual and must immediately return all copies to MMAL upon termination or expiry of your Agreement with MMAL. This Manual contains Confidential Information of MMAL and must not be disclosed to any person for any purpose other than strictly in accordance with your Agreement with MMAL.

INTRODUCTION

This document covers the ammendments to the Warranty Information System (WIS) version 2.0.6. Several ammendments are precursors to future version updates that will be released later in 2011. The functional ammendments within this version refers to Capped Price Servicing and Recall/Campaign claiming. The processes make it easier to create these claims and includes some basic validation to improve the correctness of the claim.

It is important to note the information shown on the Warranty Information System should be used as a guide. The claim details must always be confimed via DEACON to ensure they are processed and paid promptly by MMAL.

There are also several changes to the saving and sending of a claim. These changes are precursors to the next version of WIS that will contain more validation processing for all claim types.

PREREQUISITE: This document assumes the reader understands the claiming process and an understanding of the Warranty Information System.

2. VERSION VERIFICATION

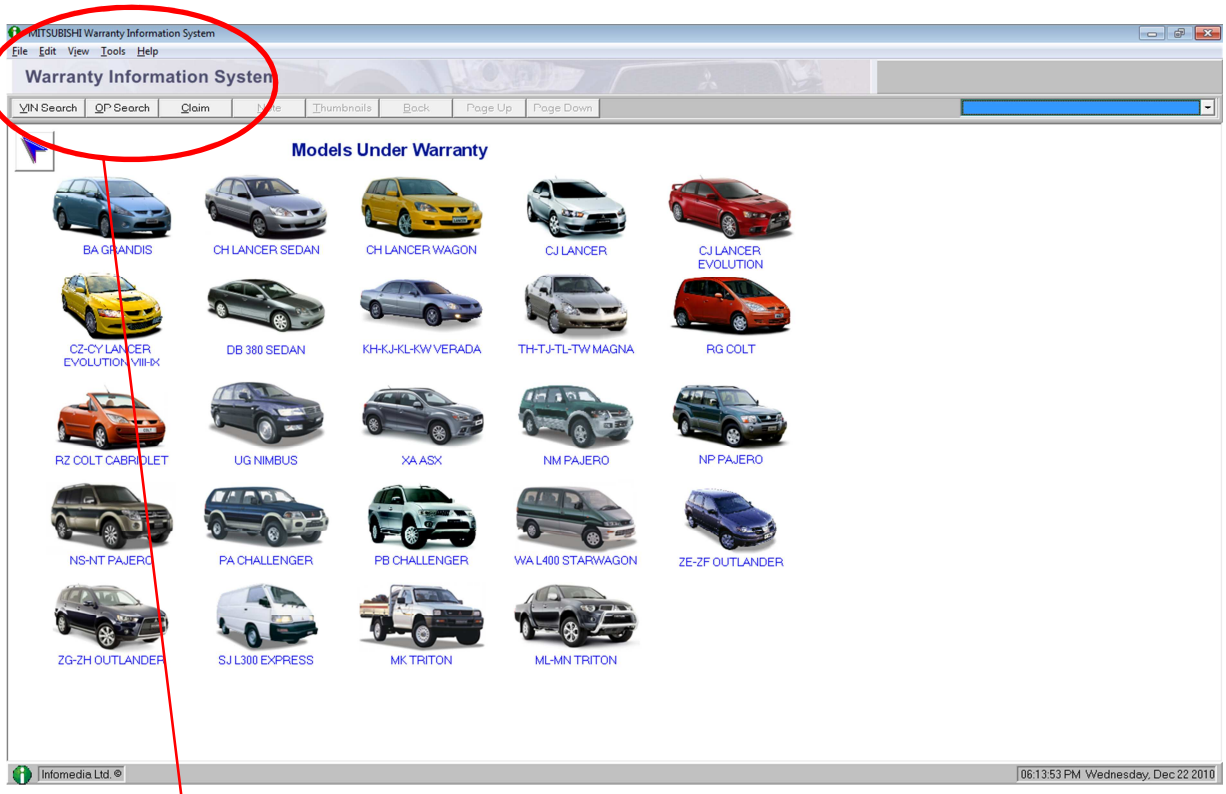

Figure 1 Warranty Information System

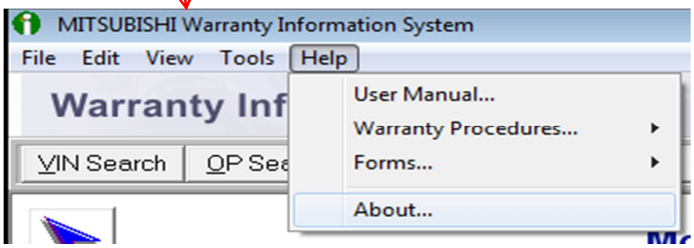

Figure 2 Help

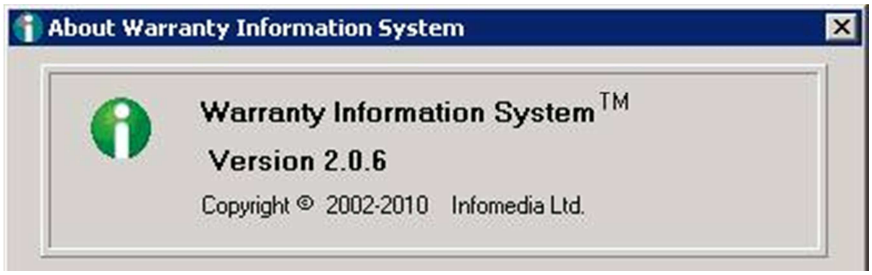

Figure 3 About

To ensure the correct version has been loaded to your computer. Located on the introductory screen (Figure1), select the Help About… (Figure 2). The pop up window should show the version (Figure 3). Please make sure the version is 2.0.6 or greater.

3. VIN SEARCH

The VIN Search function contains additional vehicle information to identify whether it is eligible for Capped Price Service or an outstanding Recall/Campaign is required to be performed.

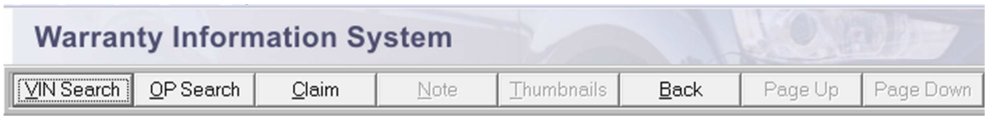

Figure 4 Warranty Information System Title Bar

Select the VIN Search tab shown above in Figure 4. The Mitsubishi Vehicle Search pop-up window will appear (Figure 5).

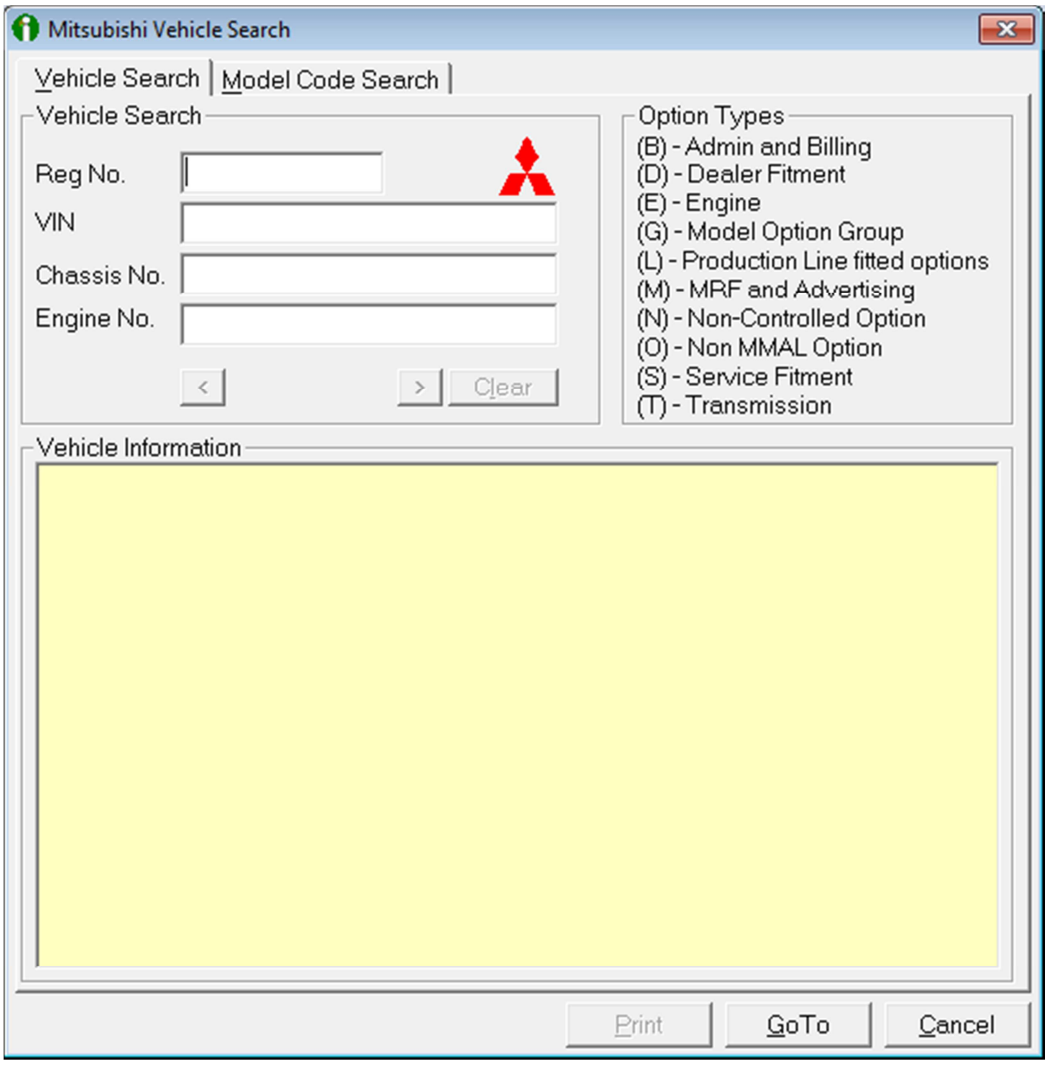

Figure 5 Mitsubishi Vehicle Search

CPS

Enter either, the Reg No, VIN, Chassis No or Engine No Vehicle Identifiers of the vehicle being enquired. Press the Enter key and the vehicle details are displayed (Figure 6) .The new details for a vehicle that is eligible for CPS will now contain (only as Reference) the CPS events as well as the CPS icon .

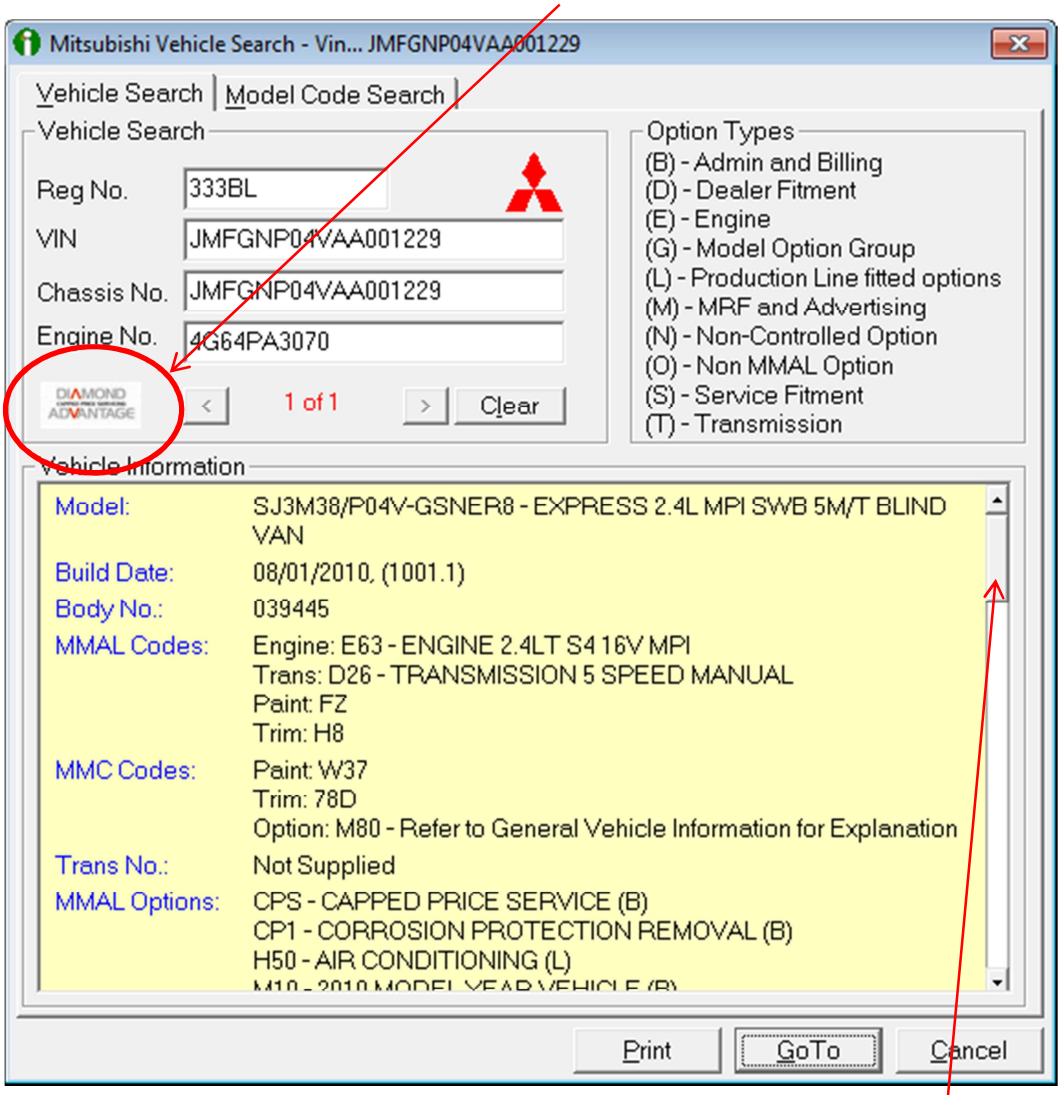

Figure 6 Mitsubishi Vehicle Search

The details of the available CPS claims are near the bottom of the "Vehicle Information" pane. Drag the side control bar to show the detail as on Figure 7.

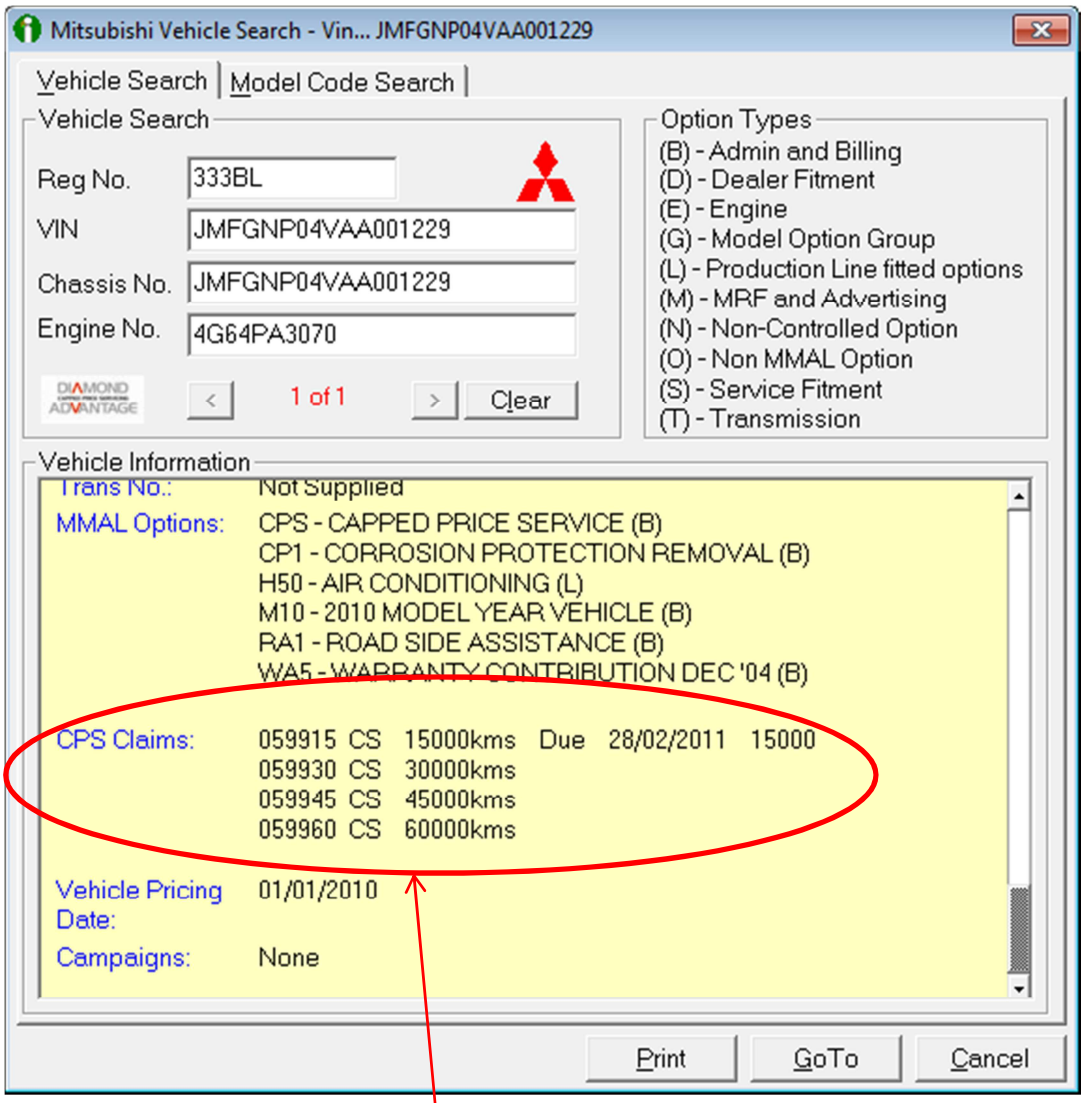

Figure 7 Mitsubishi Vehicle Search

The CPS Claims details of the vehicle (circled) are displayed. Note the due date for the first service is displayed. Once that service has been claimed the next service will display the due date.

Below the Vehicle Pricing Date the “Campaigns:” title shows there are “None” for this vehicle.

Import the VIN for claim processing by clicking the “GoTo” button and activate the import button on the Warranty Service Claim screen (Figure 9).

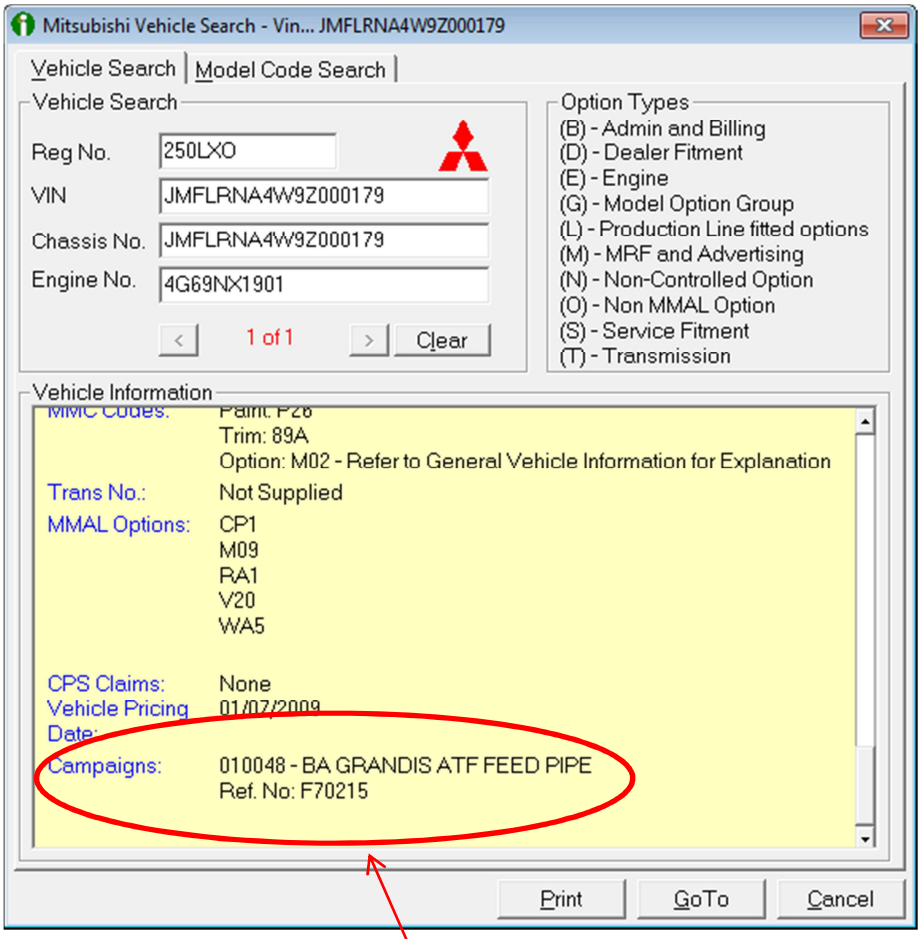

Figure 8 Mitsubishi Vehicle Search

Figure 8 shows an outstanding Campaign of the AFT Feed Pipe (circled) for the vehicle JMFLRNA4W9Z000179.

4. CLAIM CREATION PROCESS

ARRIVAL, FACTORY, PARTS & ACCESSORIES, WARRANTY CLAIM PROCEDURE

This section describes the process of creating a claim highlighting the changes in the process and screen displays. The process is relevant for Arrival, Factory, Parts and Accessories and Warranty Claims only.

CHANGES TO SCREEN

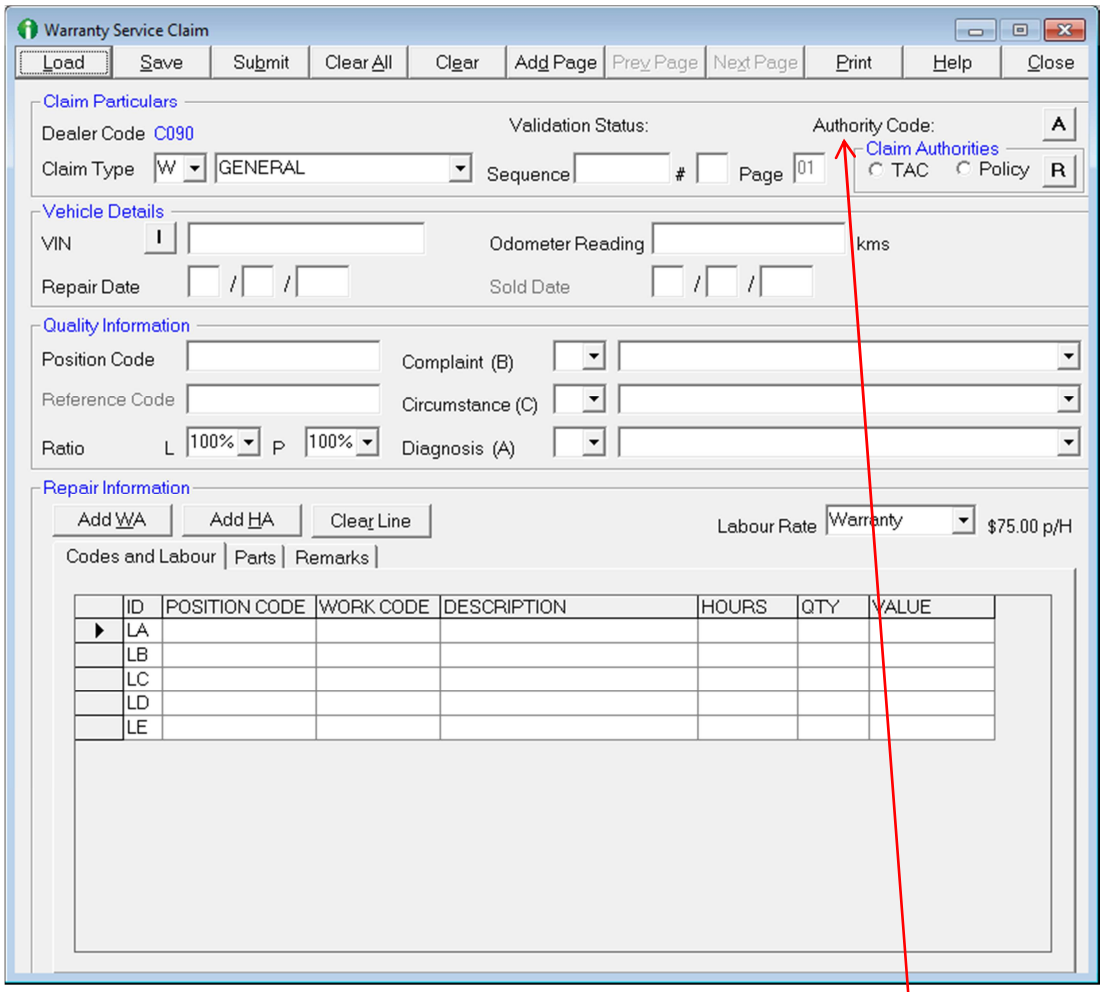

Figure 9 Warranty Service Claim.

Figure 9 shows the screen changes to Warranty Service Claim window where the Claim Authorities have been reduced to TAC and Policy selection only. In addition there is the Authority Code button 

.

CONFIRM AUTHORITY APPROVAL

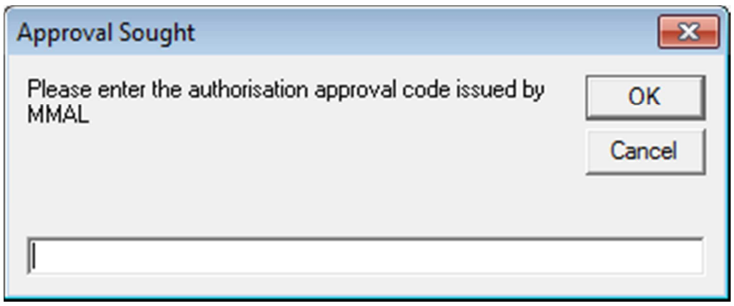

Figure 10 Approval Sought

In selecting the Authority Code button 

Figure 10 “Approval Sought” pop-up window is displayed. This window is used to allow claims that need manual judgment by MMAL or need prior approval like an SCA.

The Approval Authority Code can be obtained from MMAL, please refer to Further Information for contact details.

LOADING CLAIMS

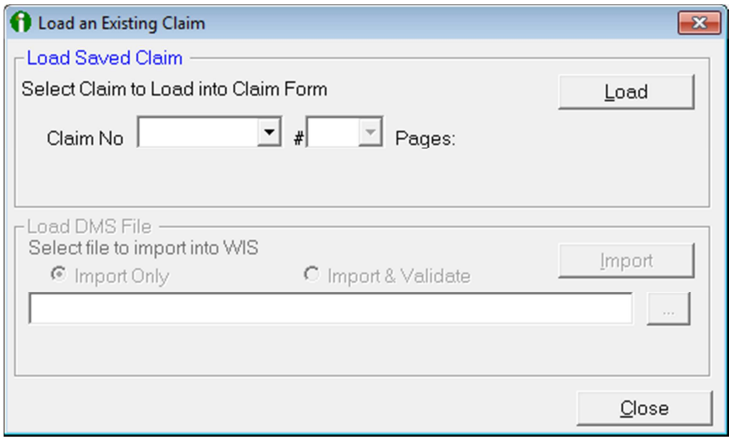

Figure 11 Loading Existing Claim

The change to the Load Existing Claim pop-up window is the “Load DMS File”. It is currently greyed out but will become available in future releases. Its function is to load DMS batch files to the WIS system for claim validation.

PROCESSING CLAIMS

This section assumes the reader is competent with creating a claim in WIS. Below is a complete claim ready for saving.

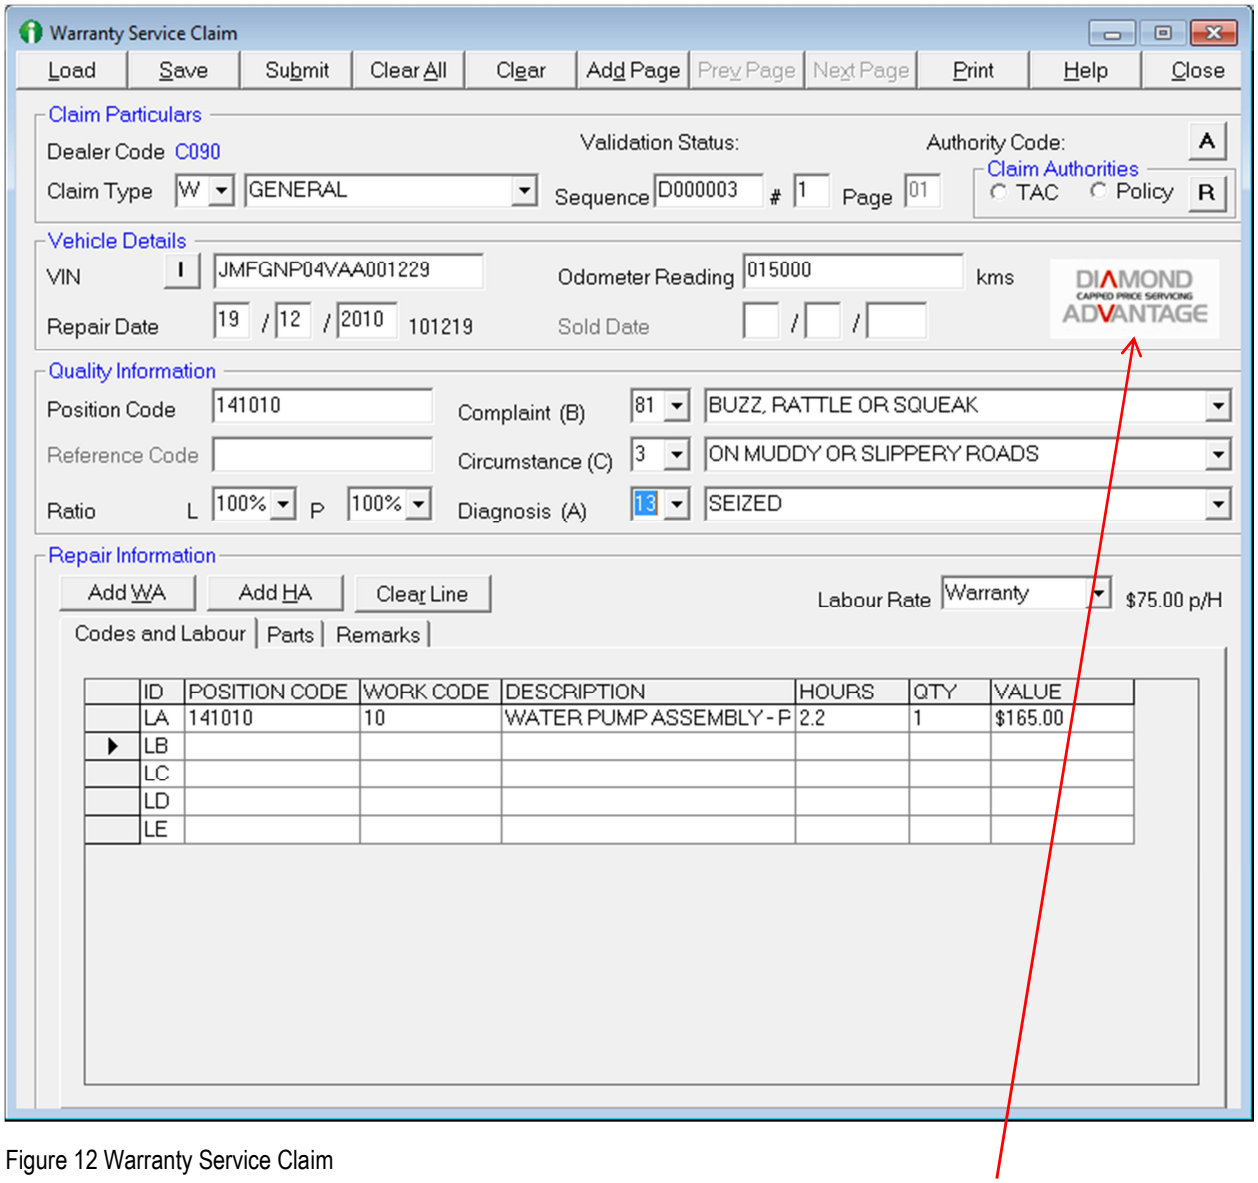

Figure 12 Warranty Service Claim

Figure 12 shows a completed claim prior to saving. Please note that the Diamond Advantage button exists for this VIN.

This buttons use will be shown later in this document under Capped Price Service Claim Procedure.

QUALITY CODE SELECTION

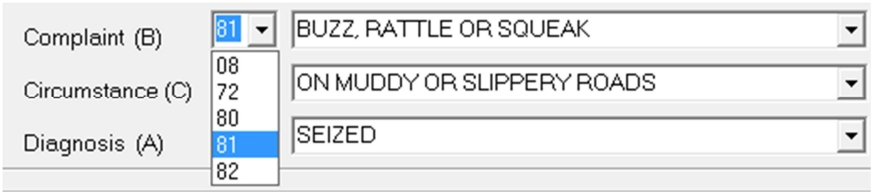

Figure 13

The Quality Information fields Complaint (B) and Diagnosis (A) have a direct relationship to the Position Code. This means the drop down list will have a sub set group that is appropriate for the Position Code. As Figure 13 shows, the reduced Complaint Codes available for the Position Code.

SAVING A CLAIM

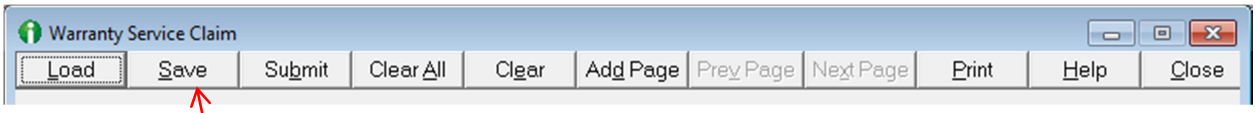

Figure 14

Selecting the Save button will save these claim types (Arrival, Factory, Parts & Accessories and Warranty) . An interim warning window (Figure 15) will be displayed prior to the Save window (Figure 16). Simply click the OK button on both windows.

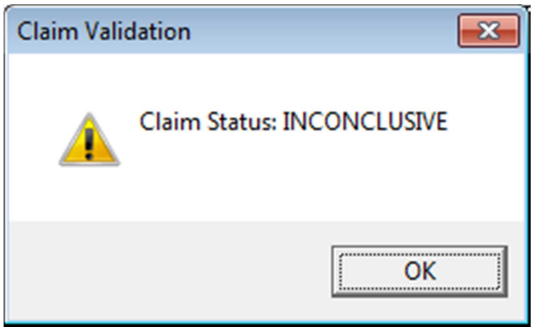

Figure 15

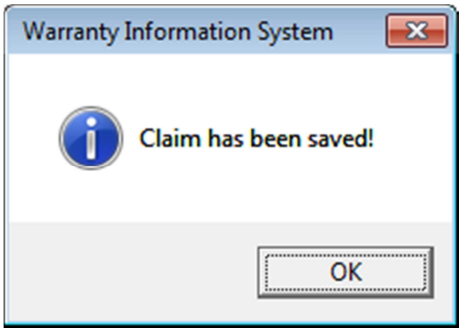

Figure 16

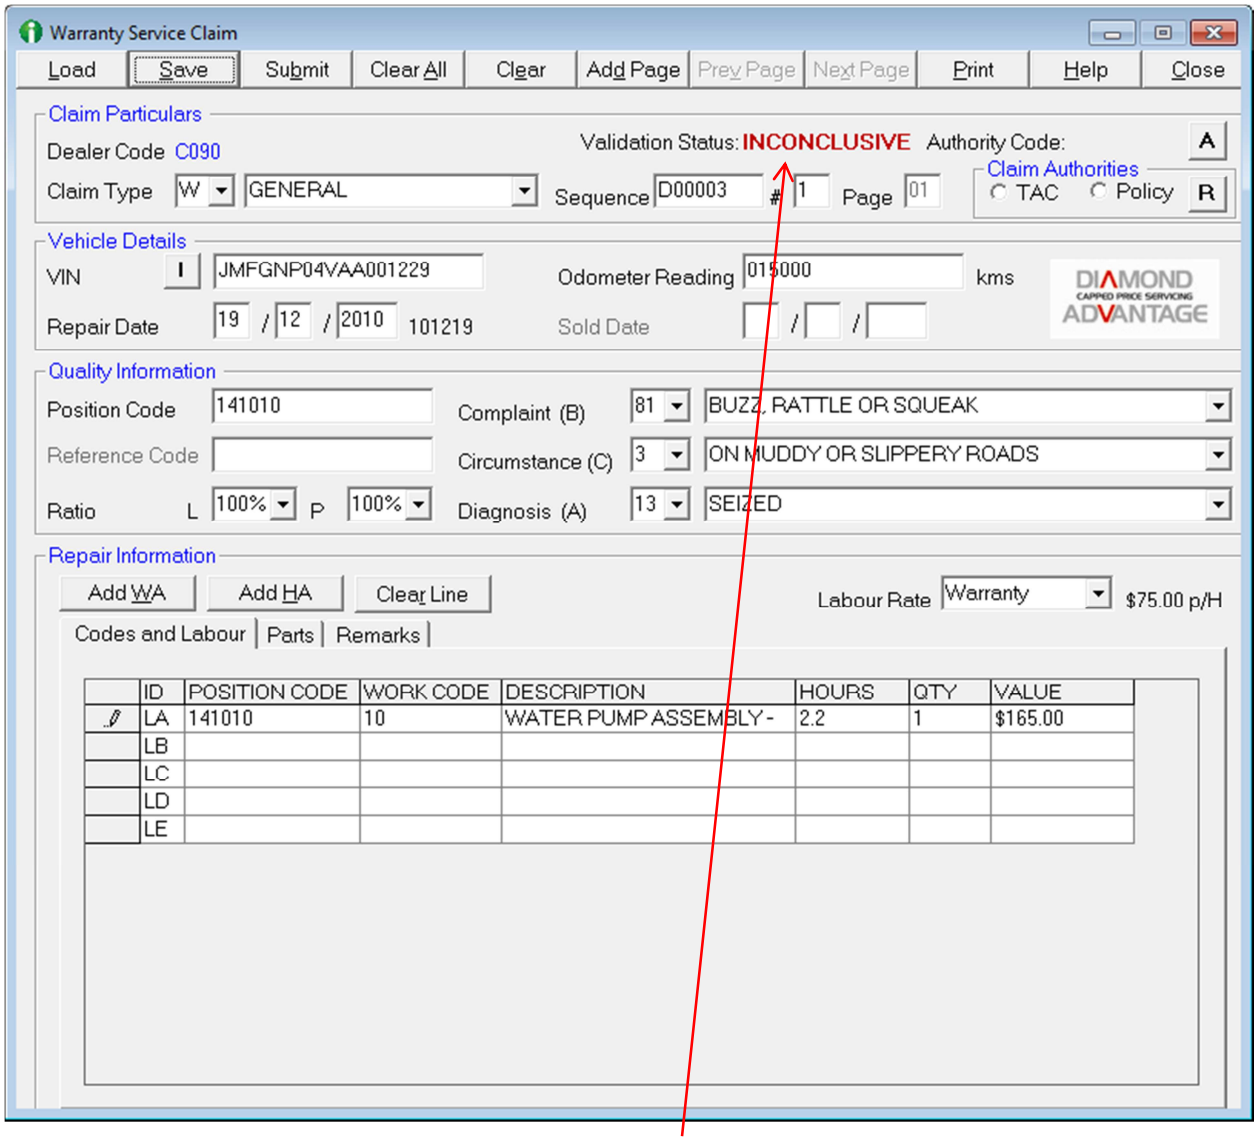

Figure 17 Warranty Service Claim with a Validation Status of INCONCLUSIVE

This screen shows the claim as inconclusive this is considered a valid claim ready for transmission to MMAL.

CAPPED PRICE SERVICE CLAIM PROCEDURE

The following defines the changes to creating a CPS claim. The DIAMOND ADVANTAGE button allows the selection of the available CPS and populates the Quality Information and Repair Information. The only details required are the Vehicle Details and the Claim Particulars; Sequence Number and Suffix.

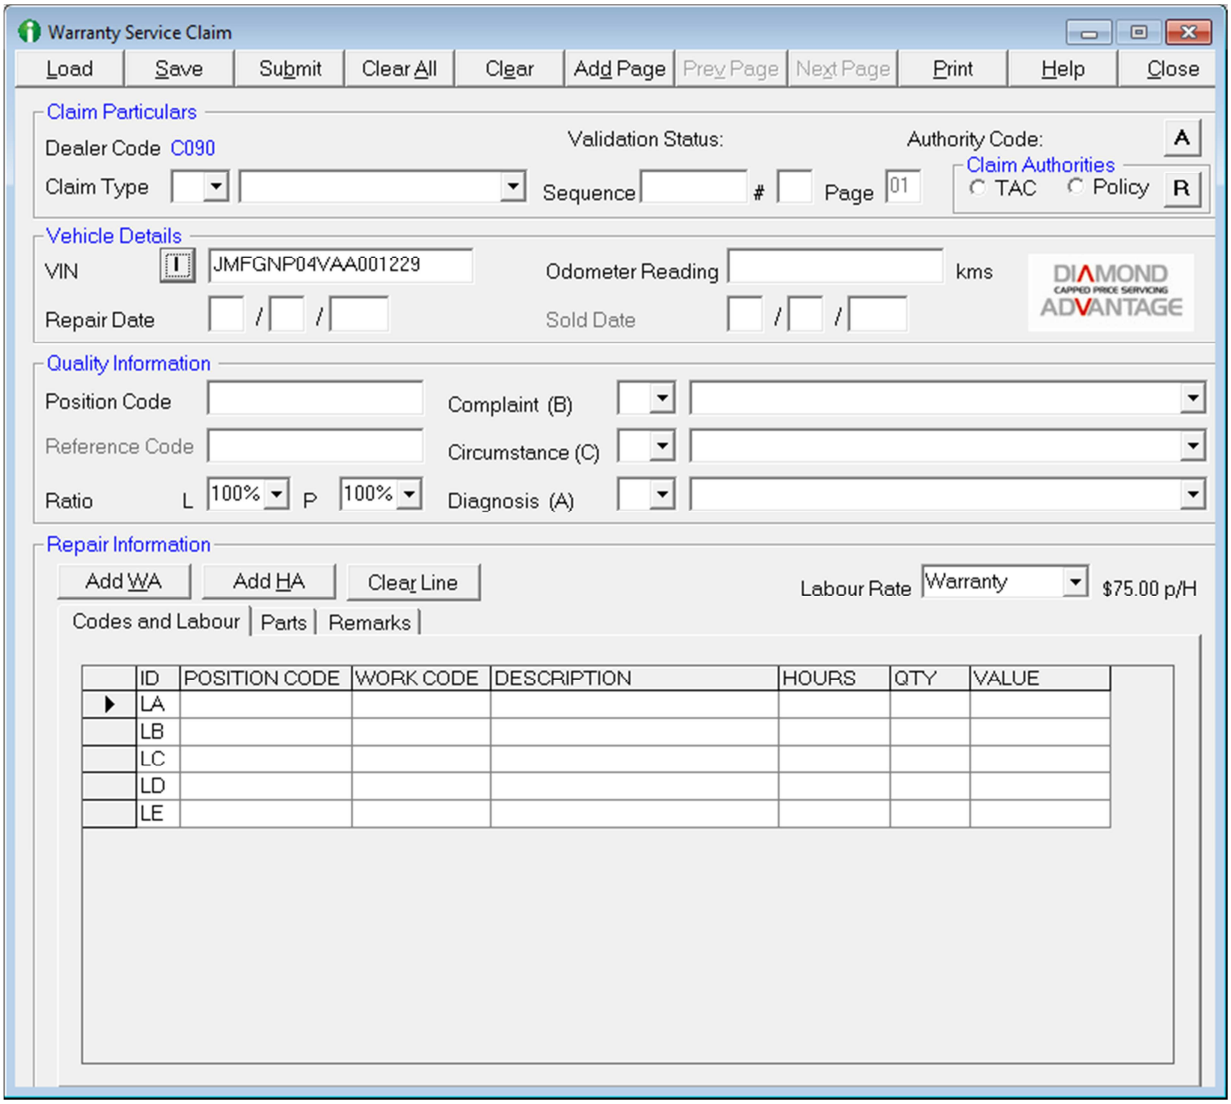

Figure 18 Warranty Service Claim with Imported VIN number.

SELECTING A SERVICE

Click on the  button and the following window will appear. (Figure 19)

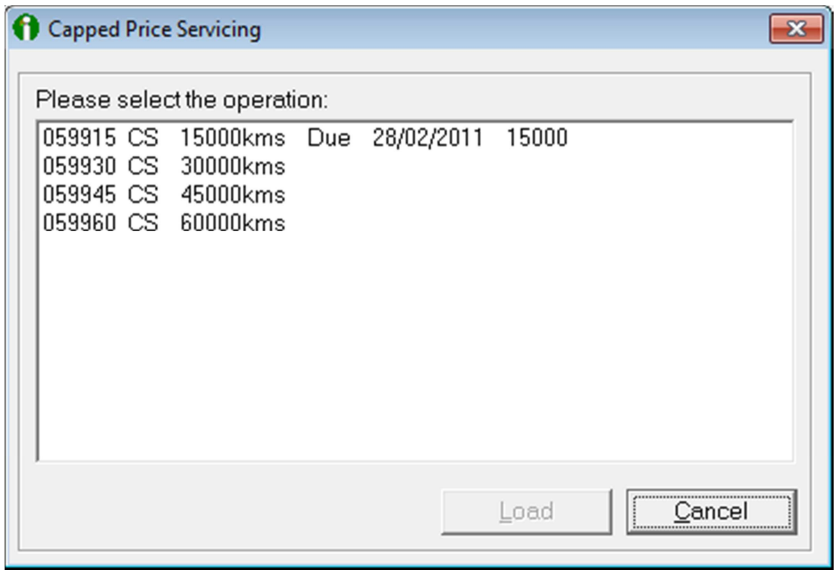

Figure 19 Capped Price Servicing.

Click on and highlight the available service being claimed.(Figure 20)

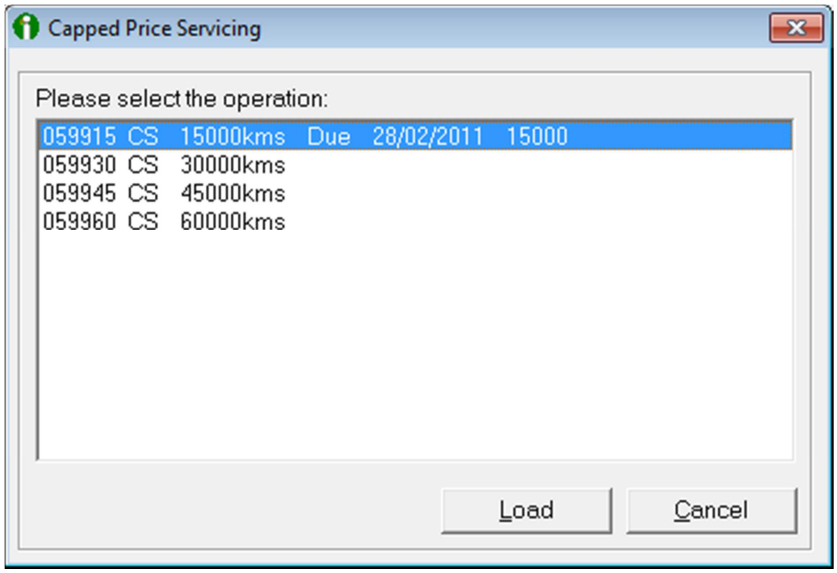

Figure 20 Capped Price Servicing.

Then click on Load button. Enter the Sequence Number, Suffix, Odometer Reading and Repair Date Only.

NOTE: Always assume this information presented may be out of date. Please refer to “Validate The CPS Claim” section to verify the accuracy of the data.

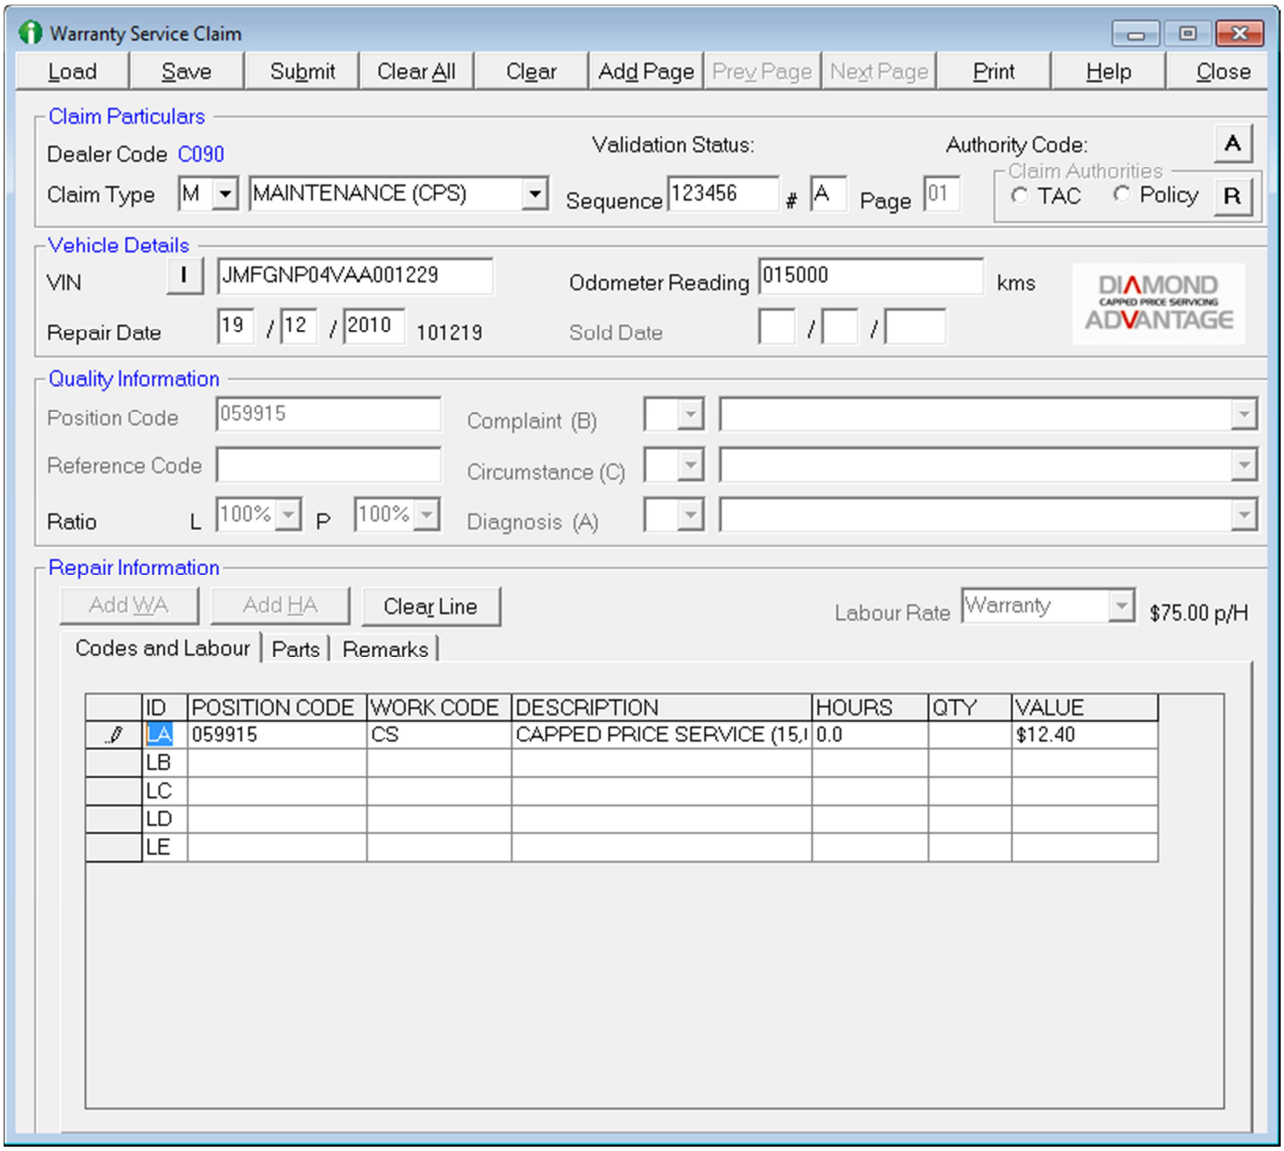

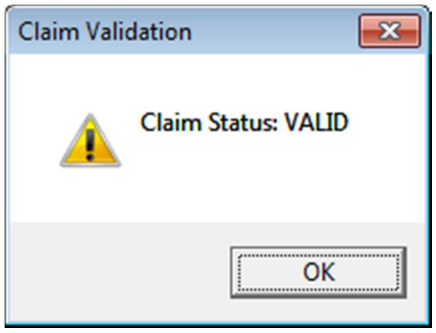

Figure 21 Warranty Claim Service with CPS.

The Quality Information and Repair Information are complete and are not modifiable. Any attempt to change the detail within the Repair Information will be overwritten with the default details after the Save button is clicked.

SAVING A CLAIM

Click the Save button to compete the CPS claim. The message window below will appear.

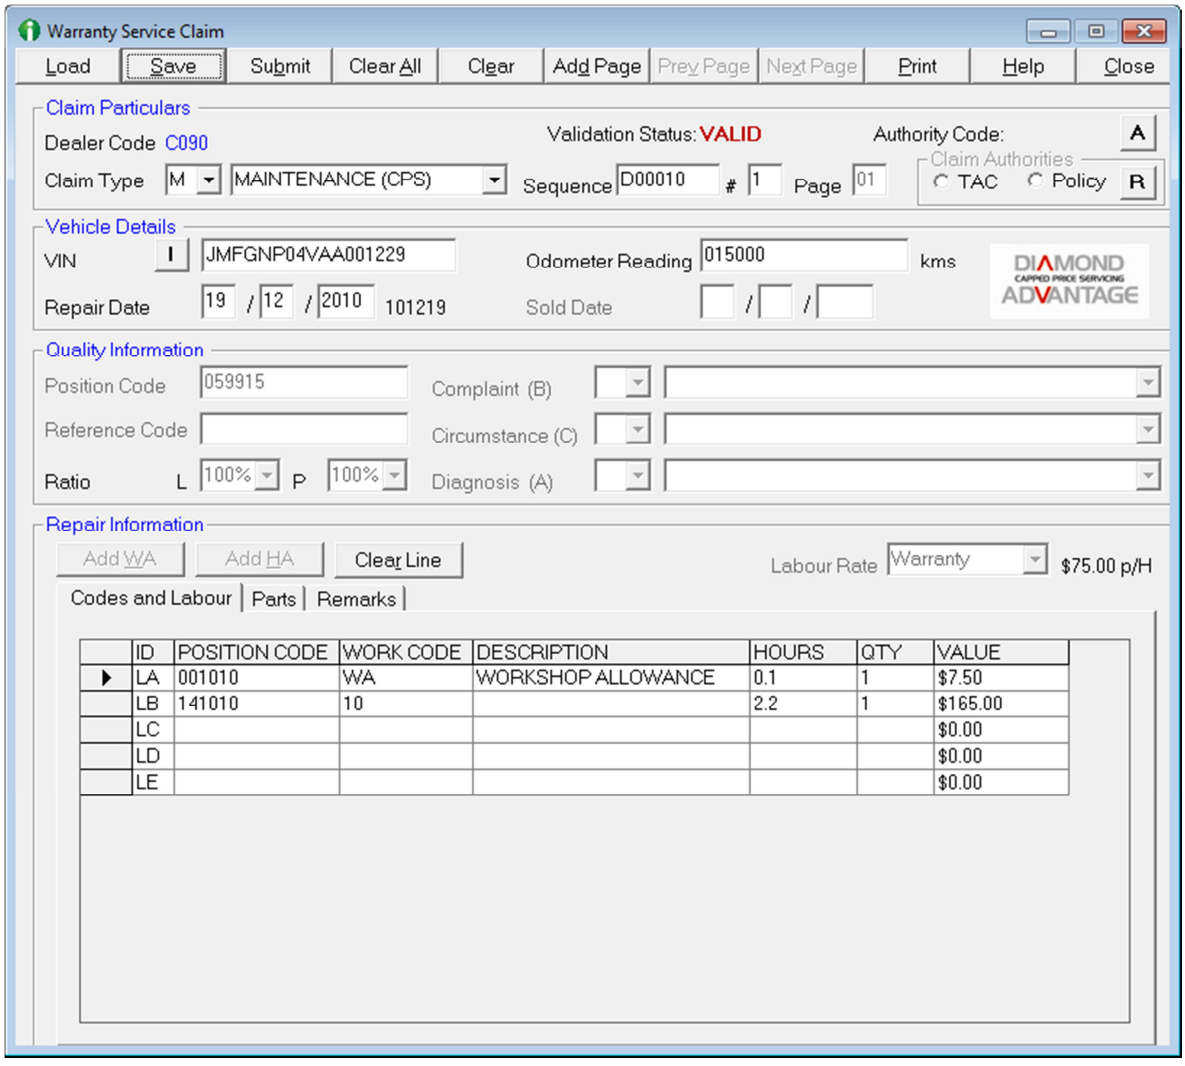

Figure 22 Warranty Claim Service with valid CPS.

The CPS claim can now be submitted for transfer to MMAL.

VALIDATE THE CPS CLAIM

To determine the Capped Price Service status of any vehicle, log on to MMAL's Deacon system and navigate to the Vehicle Enquiry screen.

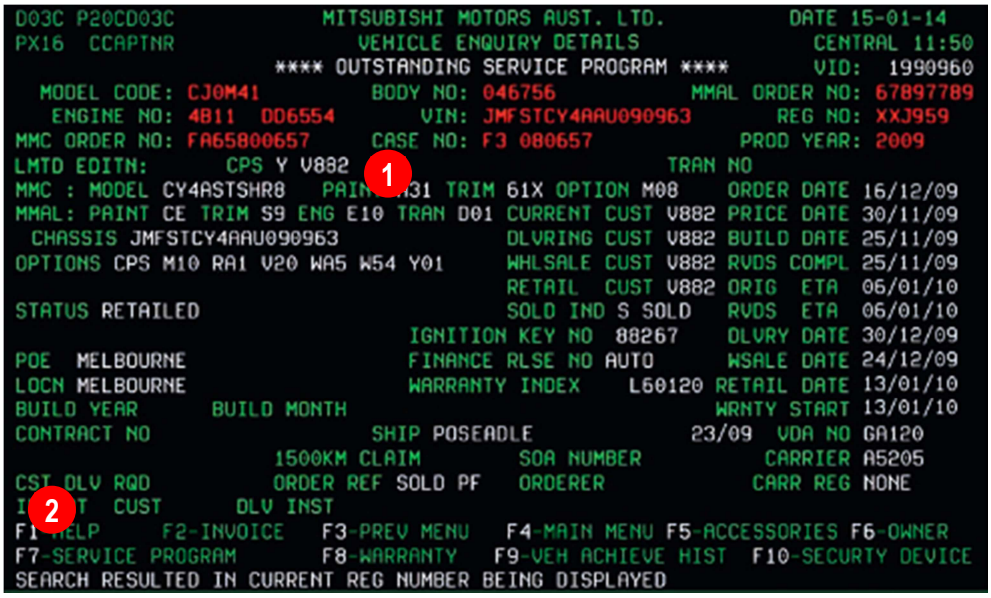

Figure 23 DEACON Vehicle Enquiry Details

(1) CPS Status; a new field has been introduced to display the status of the vehicle in the CPS program. Y = Yes, N = No, R = Removed, E = Expired.

Also displayed is the dealer code that is assigned for CPS purposes for this vehicle.

(2) Use the 'F7' to go to the Service Program screen.

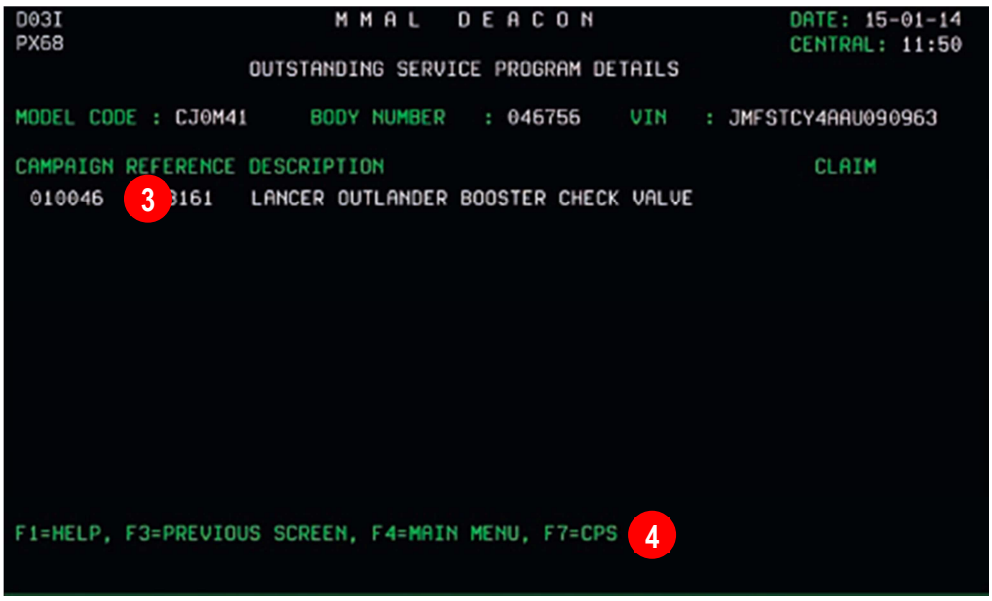

Figure 24 DEACON Outstanding Service Program Details

(3) If there are any outstanding Service programs for this vehicle, it will be displayed here. If under the “CLAIM” heading, the word “RECEIVED” is shown, then the campaign has already been performed and a claim has been submitted but not yet paid.

(4) Use the ‘F7’ key to go to the Capped Price Service screen.

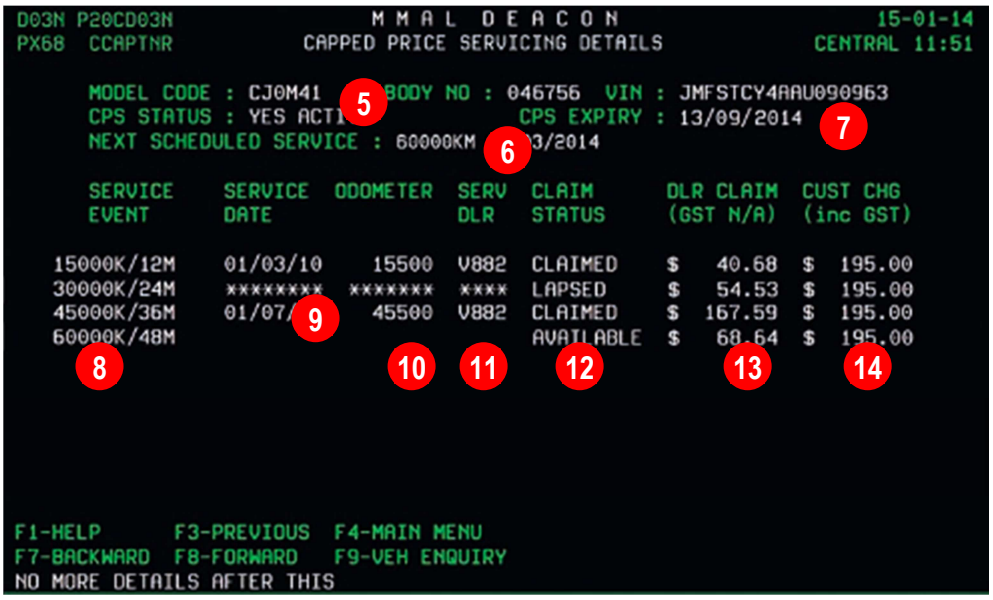

Figure 25 DEACON Capped Price Service Details

If the vehicle is active on the CPS program then this screen will display the details of the CPS services for that particular vehicle.

(5) CPS Status; e.g. Active, Not Active, Expired or Removed

(6) CPS Expiry date,

(7) Next Scheduled Service,

(8) Service Events; e.g. 12 month/15000k/ service.

(9) Service Date; the recorded date that the service was taken.

(10) Odometer; the recorded odometer of the service that was taken.

(11) Servicing Dealer; this will be blank if the enquiring dealer is not the servicing dealer.

(12) CPS Service status; Claimed, Lapsed or Available.

(13) Dealer Claim amount; this is the total amount that the dealer can claim on MMAL for the CPS service. (GST is not applicable)

(14) Customer Charge; this is the maximum that the dealer can charge the customer for that service on that vehicle. (Note: this amount includes GST)

RECALL/CAMPAIGN CLAIM DETAILS

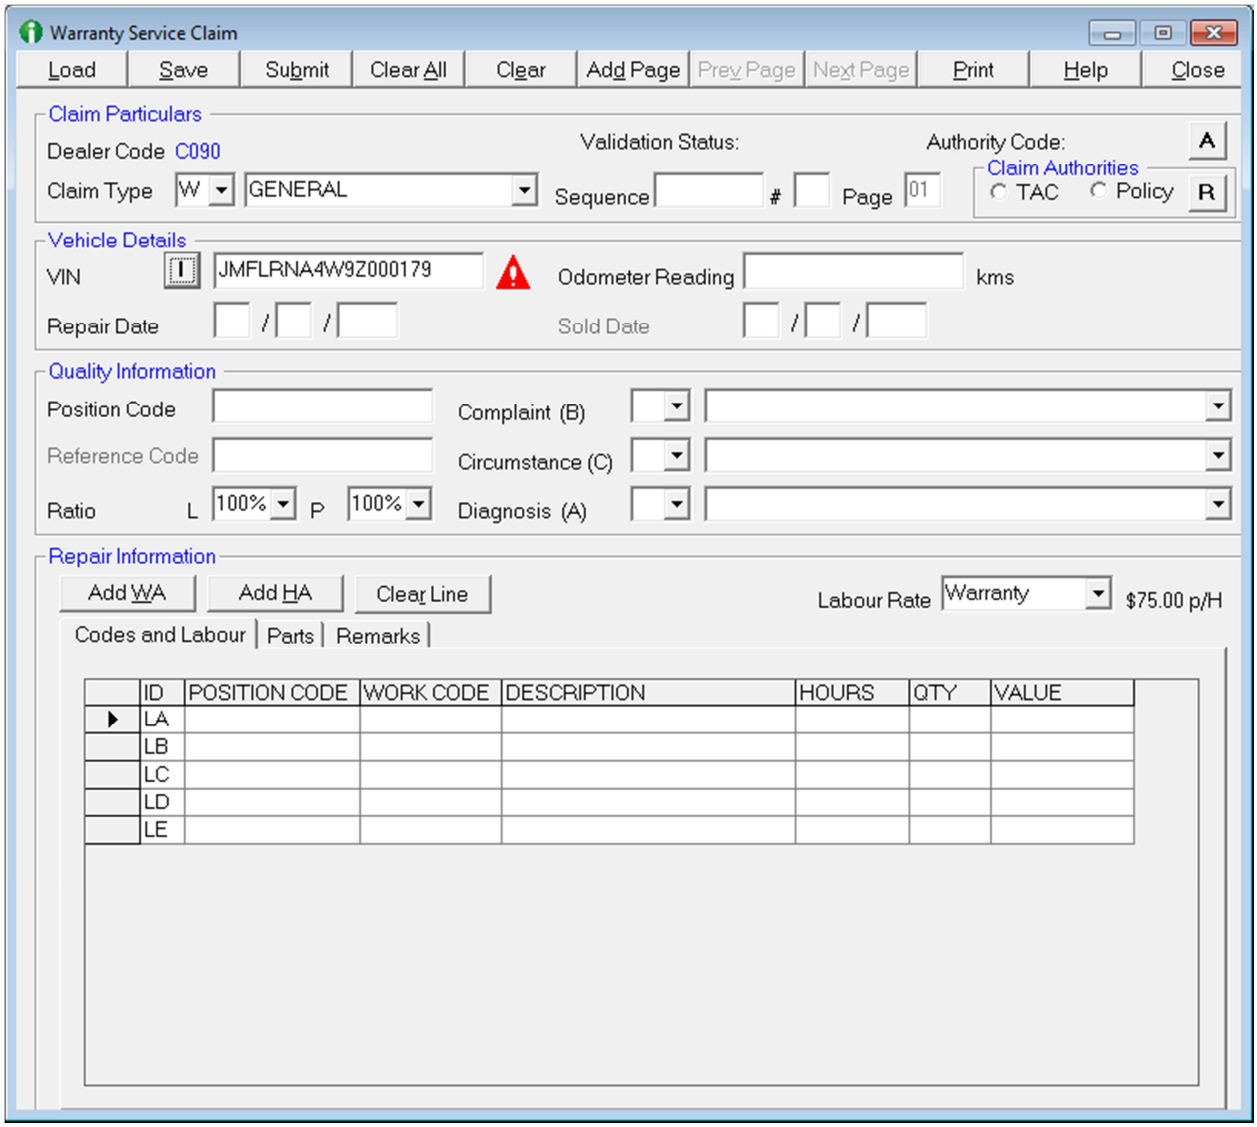

Figure 26 Warranty Service Claim with Vehicle requiring Campaign servicing.

Import the the vehicle VIN where the vehicle requires a Campaign service. Note the Red Trianglar Exclamation Symbol. By moving the mouse arrow over the Red Trianglar Exclamation Symbol, the message pops up

“This vehicle has outstanding campaigns. Click to view more details”

Click on the exclamaiton symbol the following popup window appears (Figure 27).

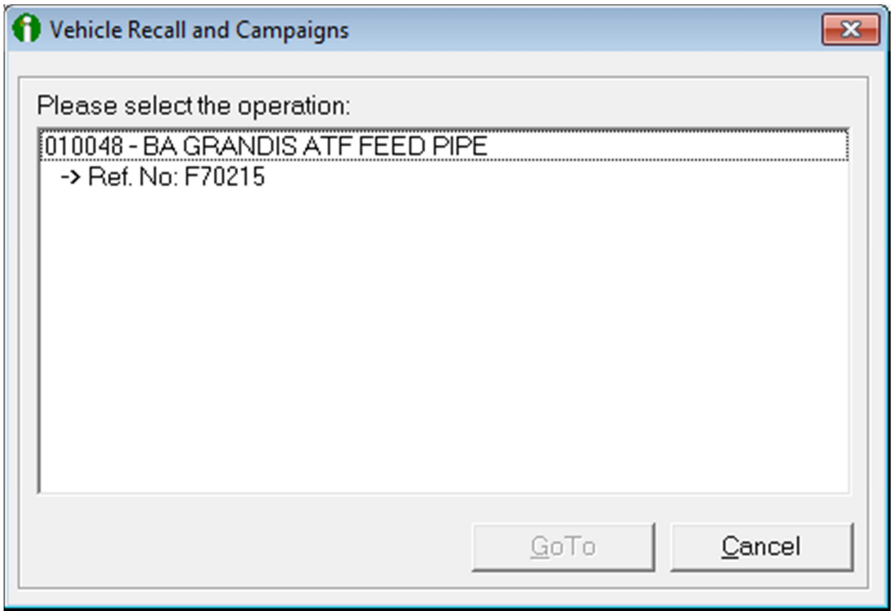

Figure 27 Vehicle Recall and Campaigns

This window gives the reference number for the recall 010048 BA Grandis AFT Feed Pipe. This information show there is an outstanding campaign that requires to be performed. Always ensure that the repair has not be undertaken previously by checking on DEACON.

5. CLAIM CREATION PROCESS

This process defines the Submission process to send valid claims to MMAL for judgment and payment. It also highlights the changes to the screen display of the Claim Register Window.

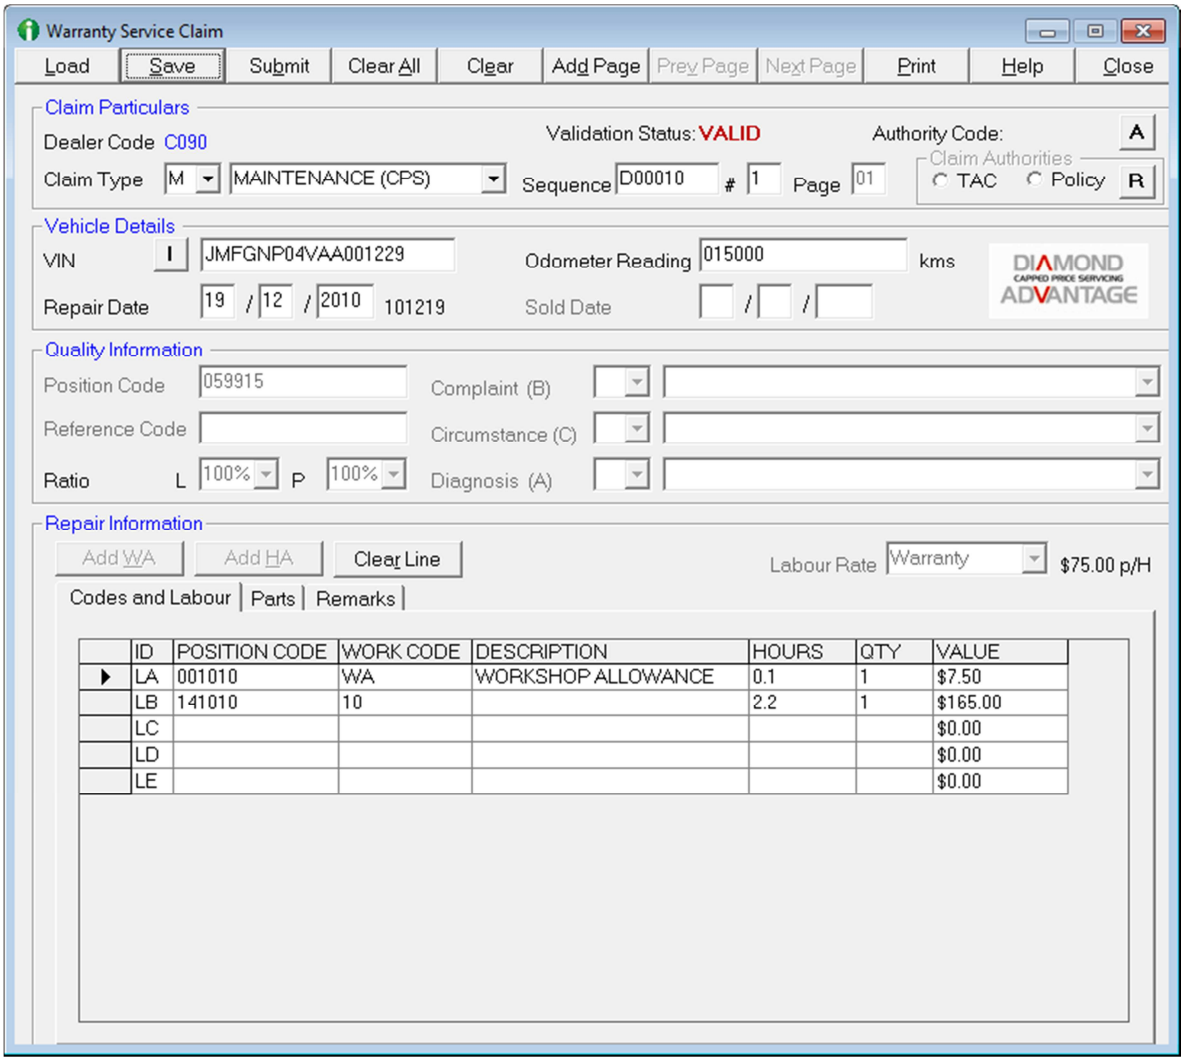

Figure 28 Warranty Claim Service with valid CPS.

Select the Submit button to 

enter the Claim Register (Figure 29)

CLAIM REGISTER

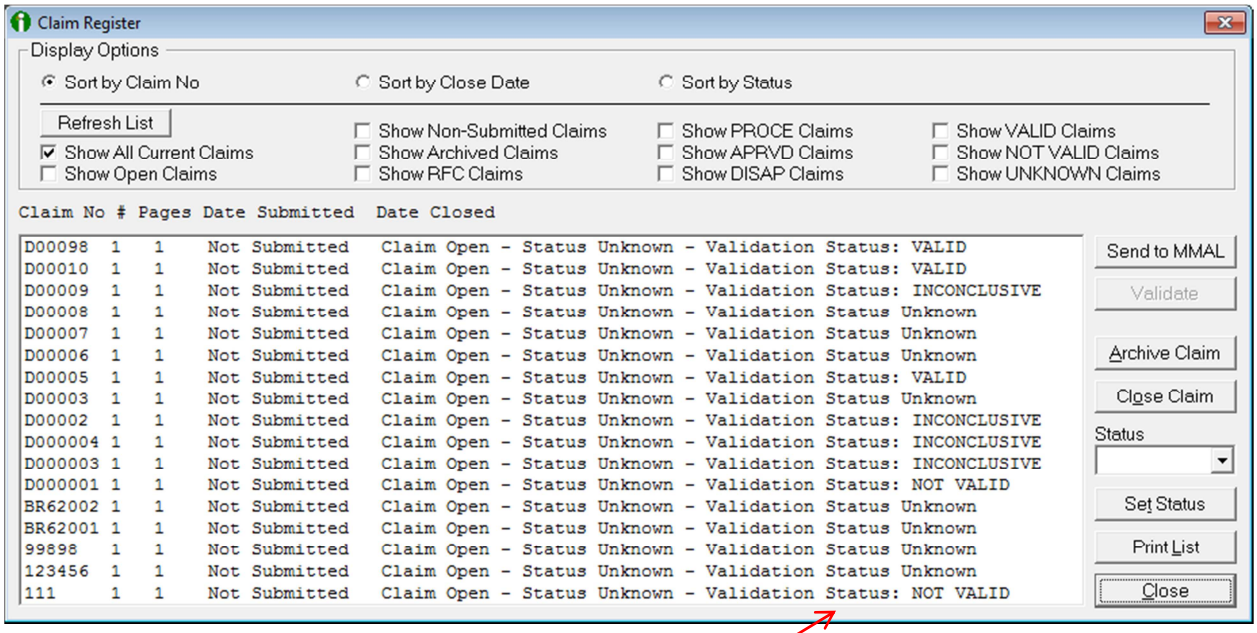

Figure 29 Claim Register

The changes to the Claim Register are the addition of the Show VALID Claims, Show NOT VALID Claims and Show UNKNOWN Claims. They will show claims based on the new "Validation Status:" that appears at the end of each claim listed. There is no longer "Save for MMAL" nor "FTP to MMAL". This has been replaced by the "Send to MMAL" button. Also the claims are now saved in the Warranty Service Claim screen.

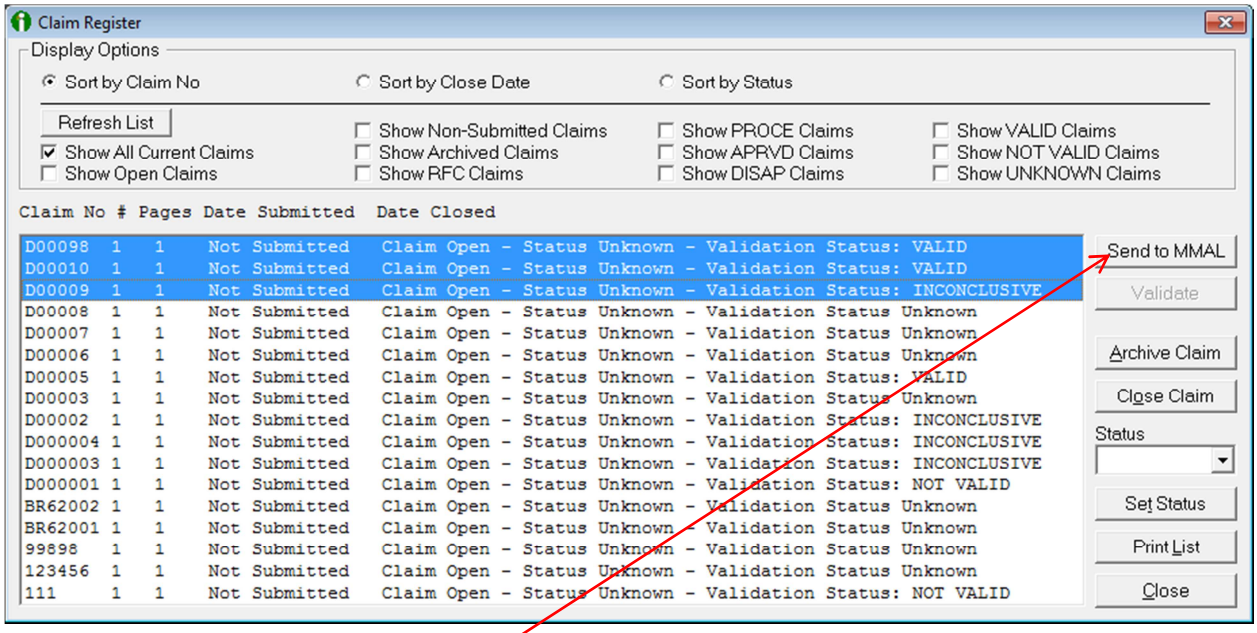

Figure 30 Claim Register with highlighted claims

To select a claim or claims click on the claim with the mouse cursor and drag the highlight over the claims ready for transmittal and click on the “Send to MMAL”.

Note: All claims with VALID and INCONCLUSIVE will only be allowed for transfer to MMAL.
