Cause Part Indicator

Some Dealers are experiencing a problem when submitting warranty claims, where the cause part indicator is not being populated in the SAP warranty system. The problem may be occasional or it may be regular in its occurrence.

MMAL have identified that the issue may occur when Dealers import and validate a claims file from their DMS to WIS.

To rectify this problem, Infomedia have created a patch for the current version of WIS which will prevent the cause part indicator being dropped in the transmission from WIS to SAP. MMAL Warranty recommends that all Dealers who import a claim file from their DMS to be validated in WIS contact Infomedia to have the patch installed. Dealers that don't import a file to WIS from their DMS are not required to install the patch. The next version of WIS will be updated to include the patch data.

Dealers should contact Infomedia by ringing the Infomedia help desk on 1800 810 103 and instructions will be given on how to install the patch.
