Changes to MMAL SAP Warranty System (Update)

Today MMAL have approved changes to be made to the SAP system that will resolve a number of warranty issues. As a result it will be necessary to stop claims from being loaded into the SAP environment. So claims submitted after 6.00pm (Adelaide time) today will be held on the FTP server until tomorrow morning. This means that claims submitted during this period will not appear in your Warranty Log report until tomorrow morning after 10.00 (Adelaide time).

Update 1.
Due to a technical concern with the changes made to SAP last night, there is a delay in releasing claims from the FTP server to SAP. At this time MMAL are working with IBM to resolve this issue and will advise when the system is working correctly. As a result Dealers will not be able to see new claims in Warranty Log or Work Overview. Dealer can continue to upload claims to the FTP server.

MMAL Warranty Department thank you for your patience in this matter.
After the changes are made the following issues should be resolved:

1. Correct application of ratio codes on claims with an SCA
2. Claims with NFP as the causal part and a labour line of FANTOM will no longer be stopped with an error.
3. Claims that do not match the terms or conditions of an SCA will be returned to the Dealer with an error.
4. Recall and Campaign claims that are paid should appear on the Work Overview "Accepted" Report.
5. Campaigns that have been subject to an approved claim will be marked as Vehicle Corrected.
