Diamond Certified Vehicles

This bulletin is to alert users about problems that exist with the warranty on Diamond Certified Vehicles.

Due to a system issue the warranty calculated end dates on the Master Warranties are not being updated on vehicles designated as Diamond Certified Vehicles when they are on-sold. This means that the Master Warranty is showing that the vehicle is out of warranty when it is not. The vehicle below, for example, is showing that it is out of bumper to bumper warranty (01-60-130) but, in fact, is still in warranty because it is a Diamond Certified Vehicle on sold in 2008.

The customer should have their Diamond Advantage Warranty Certificate with them and this will confirm if the vehicle is in warranty and should be the first port of call.
The certificate looks like this:

What Warranty should be applied to these vehicles?

Diamond Certified Vehicles pick up the balance of the 10 Year Warranties so these will be as per the Master Warranties on the Warranty Information tab. For the 5 Year Warranties add 5 years to the On Sold date.

For kilometres the balance of the original warranty applies.
Details of the warranty terms are contained in General Letter GL-07-022.

MMAL are endeavouring to fix this defect but cannot at this stage commit to timing. We hope that this information has been useful.
