WARRANTY INFORMATION BULLETIN

WIB 2013-18 20/09/2013

This Bulletin forms part of the Warranty Procedure Manual.

ATT: SERVICE MANAGERS/WARRANTY ADMINISTRATORS

Incorrect Claim Data Entered on Claim

From time to time incorrect claim data is entered on Dealer's warranty claims. Items such as the repair date, odometer or VIN are typical of the items entered with incorrect data.

Dealers are reminded of the importance of entering the correct data on to their claims and that all claim data should be checked thoroughly before the claim is submitted. Claims submitted with incorrect data can affect either your dealership or another dealership and may prevent the submission of future claims.

If a change is required to an already approved claim, effective from the date of this bulletin, Dealers must email MMAL Warranty Administration a full copy of the repair order applicable to the claim that needs to be changed. This includes but not limited to technician's remarks, clocking times, vehicle data and customer signature.

Making changes to claim data on already approved claims is a complex and time consuming process that is not required if more care is taken at the time of initial claim creation and submission. Future claims may be affected which could impact claim submission in the required time frame and may result in non-payment or delayed payment of that claim.
