This Bulletin forms part of the Warranty Procedure Manual.

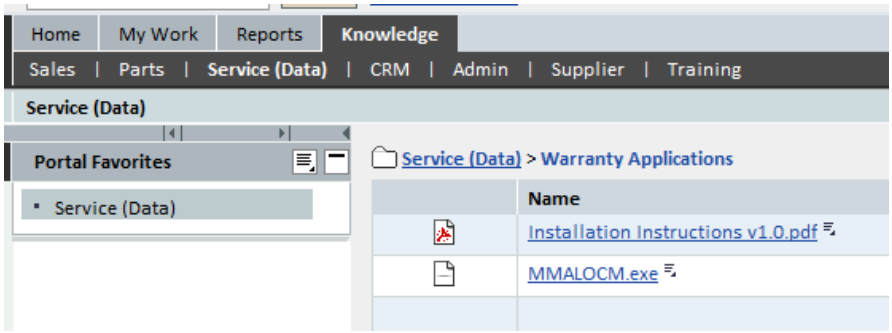

ATT: SERVICE MANAGERS/WARRANTY ADMINISTRATORS

Warranty Operation Code Manual

MMAL wish to advise the release of the Warranty Operation Code Manual.

This manual is provided to assist Warranty Administrators in preparing warranty claims with correct Operation Codes, and quality coding that matches the failure. The use of this manual should improve Dealers ability to submit claims with reduced errors and complete labour operation coding.

The manual can be downloaded from the Dealer Portal and is located under the "Knowledge" tab as shown below.

There are two files available for download:

1. "Installation Instruction", which contains detailed instructions on installing the Operation Code Manual on your local machine.
2. "MMALOCM.exe", this file is the installation program.

It should be noted that this file is approximately 75Mb in size and may take 10 minutes or more to download if you have a slow internet connection. Please read the Installation Instructions before installing on your computer.

There is no limit on the number of computers on which the manual can be installed, however information contained in the manual is provided for Dealer use only in preparing Warranty claims. Information contained in this manual must not be shared with any third party.

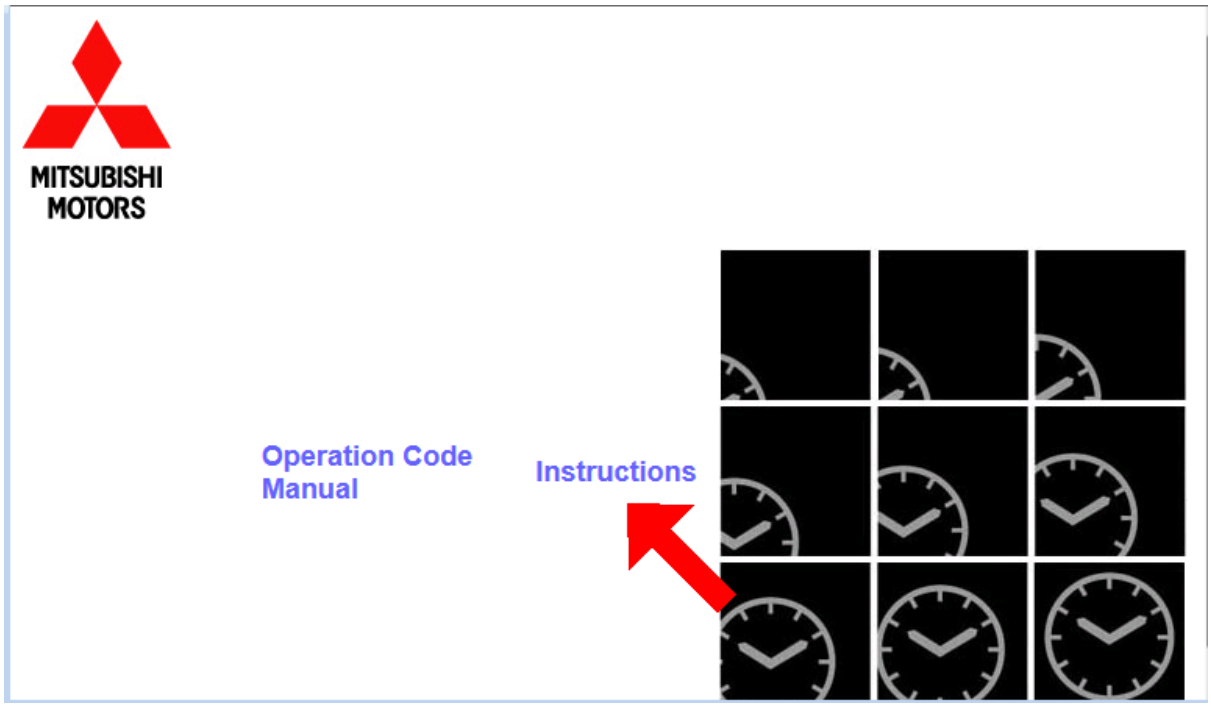

To contact Warranty Payments Administration:
Warranty Telephone: (08) 8275 2367

e-mail: warrantyadmin@mmal.com.au
mmal_warranty_admin@mmal.com.au

Address: 1284 South Road Clovelly Park SA 5042
PO Box 8 Melrose Park SA 5039

The application uses a browser to display information and has been designed to work with Internet Explorer. It has been tested on computers with Windows XP, Windows 7, IE9 and IE10. Dealers using these operating systems and browsers should not experience any issues using this application. Other operating systems or browsers are not supported. Any systems issues that cannot be resolved by your own local IT support should be reported to the MMAL IS Helpdesk.

Instruction on the use of the manual are included in the application and can be obtained from the home screen, as shown below. To open the instructions click on the link shown by the red arrow.

This manual is being provided as MMAL move away from the use of WIS in the coming months to an integrated submission system. The current manual provides both graphical and textual search capabilities for standard operation codes.

Future development is being planned to include Operation Code information on Hotline fixes and Campaigns (Recalls etc.). Information on operation coding for these is still available from the associated document that can be found on the Portal.

It should be noted that this is not a Labour Operation Time Schedule (LOTS) or Flat Rate Manual (FRM) although it does bare some similarities. Labour Operation Times will continue to be available from WIS for the time being, and the Portal Claim Submission (PCS) in the future.
