CAMPAIGN CLAIM SYSTEM

READ FIRST

This CD contains an application designed for you to manage Campaign service and claim creation for Campaign 020116

Campaign 020116, has been launched to identify Triton and Challenger vehicles that may have an overheat situation that in some cases will result in engine failure.

The application on this CD is built using Microsoft Access 2010, but you do not need MS Access to use it. The application is intended to be installed on a single machine that is connected to a printer

A number of versions are available.

See table below to determine which suits you best

Version	**When to use**
With Runtime	When no installation of Microsoft Access exists on your computer
No Runtime	Use this if the runtime has been previously installed or you have Microsoft Access 2010 installed
Access Version	Use this if you have Microsoft Access 2007 or 2010 installed. It will be necessary to copy the file to: "C:\Program Files\MMAL\". Alternatively, you will need to link the back end database manually using the "Linked Table Manager" No icons will be installed on your desktop with this method. It is recommended to create your own shortcut.

Instructional Videos

A number of videos are provide to assist with the installation and use of this system. Those familiar with software installation can skip the Installation video. The remaining videos are required viewing if the system is to be used correctly.

The videos are in MP4 format and can be viewed in Windows Media Player. In may be necessary to install the "codec" that is available on the CD in the CODEC folder.
