MITSUBISHI MOTORS

WARRANTY INFORMATION BULLETIN

WIB 2014-18 17/10/2014

This Bulletin relates to Service Campaign 020116 4D56 Hi-Power Overheat –Working procedure

ATT: SERVICE MANAGERS/WARRANTY ADMINISTRATORS

We have been receiving a number of enquiries regarding the frequency of clocking on and off the job when carrying out the 020116 4D56 Hi-Power Overheat –Working procedure. Standard clocking protocols apply that is, when you start on that job you clock onto the job, when you move to another job or another vehicle you clock off and clock onto the new job. However you need to record time start time and recheck time for step 5 on the "Campaign 020116 Service Record" sheet. (This is not a clocking time) refer below

Cautions:

1) Use the supplied "Warranty Application" to produce the technician working sheet for each vehicle.
This is to ensure the correct combination "upgrades" are performed for the specific vehicle.
A "sample" technician working sheet is shown on page 2 of this document.

2) Follow each step in the correct order **EXACTLY** as nominated in the detailed working procedure.

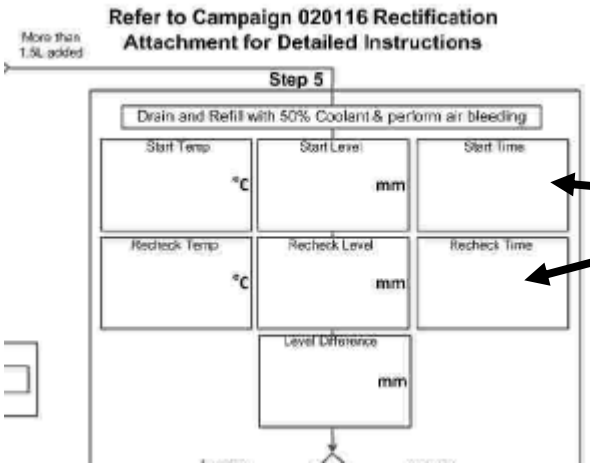

3) Record the results and clock times at each step.

4) If the steps are not followed correctly, this may result in unnecessary repairs being performed.

5**) "Failure to document the step results and the Details where required, may result in any repair claim being overturned during the audit process**."

PLEASE NOTE: This means the technician records the time on the **"Campaign 020116 Service Record" The technician is not required to clock on & off for steps 1 – 4, individually.**

To contact Warranty Payments Administration:
Warranty Telephone: 1300130099 option 2 option 4
e-mail: warrantyadmin@mmal.com.au mmal_warranty_admin@mmal.com.au
Address: 1284 South Road Clovelly Park SA 5042 PO Box 8 Melrose Park SA 5039

In **step 5** you are recording the start time and the recheck time on the sheet you have printed off .
You are not clocking off the job

Ian Matthews
Warranty Manager
National Service
