WARRANTY INFORMATION BULLETIN

WIB 2015-13 01/10/2015

This Bulletin forms part of the Warranty Procedure Manual.

ATT: SERVICE MANAGERS/WARRANTY ADMINISTRATORS

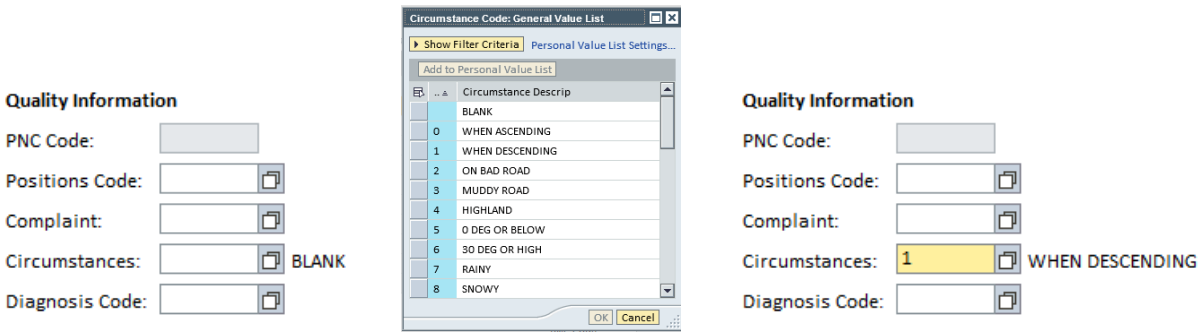

Circumstance Code

This bulletin is to advise the use of the **Circumstance Code** when submitting a claim.

The **Circumstance Code** must be supplied on claim types ZC01 Warranty, ZC04 Arrival and ZC06 Parts.

The code selected must best reflect the failure circumstance described by the customer on the face of the Repair Order (RO). Only use "D" ALL THE TIME, when this is supported by the customer's complaint.

The default code (as shown below) is "Blank", which is acceptable on other claim types or when directed by MMAL. Codes can be typed in or selected from the search box as shown below.

A full list of **Quality Codes**, including the **Circumstance Code**, can be found in the **Operation Code Manual**.

Failure to adhere to this requirement may result in a claim not being paid or reversed at a later date. The claim must also meet audit requirements and could be reversed at audit if this procedure is not followed.

As it appears there has been wide spread misunderstanding of this requirement, a moratorium will be applied to audits of claims with a repair date prior to Oct 1, 2015.
