Subject: VIN & Repair Date recording on Battery Check Report

Dear Valued Business Partners,

MMAL Warranty Administration wish to remind dealers of the requirements for supporting documentation related to 12v battery claims.

The **VIN** and **Repair date** must be **printed or written on the battery check report** for all 12v battery replacements before the battery check report is **uploaded as a claim attachment.**
Claims without the required information will be returned to the dealer.

The battery check report must be retained with the Repair Order.

As per the Warranty Procedure Manual **4.2.4.6. Diagnostic Measurements**
All MUT, diagnostic and other test results must be recorded on the Repair Order and where relevant, the printout must be attached.
For battery claims, the VIN has to be written on the Mitsubishi approved battery tester report and attached to the Repair Order.

Yours sincerely,

Fiona Lamond
Warranty Administration Manager
