Subject: Capped Price Service "Next Service Calculator"

Dear Valued Business Partners,

It was reported that some dealers have been experiencing issues with the Next Service Calculator (NSC) returning incorrect/illogical results.

MMAL have implemented a program change that should correct this issue. The change will be applied after COB tonight.

If you have not yet used the Next Service Calculator, please refer to WIB-2024-01 issued 15th March 2024 for a detailed explanation of NSC operation.

The NSC has been added to the Warranty Portal to assist dealers in providing accurate information to customers to ensure vehicles are serviced in line with the Capped Price Service schedule and to aid in maintaining Diamond Advantage compliance.

We would encourage you to make use of the NSC as part of your normal service booking process.

If you experience any issues with the NSC operation, please report these to Warranty Administration via Mi_Dealer Assist as soon as possible so they can be addressed.

Yours sincerely,

Fiona Lamond
Warranty Administration Manager
