# WIB-2024-04

22nd November 2024

**Attention**: Fixed Operations Managers, Service Managers, Service Advisors, All Service & Warranty Personnel

**Subject**: Warranty Operation (Flat Rate) Code Manual

Dear Valued Business Partners,

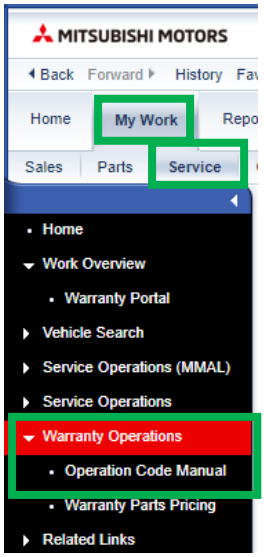

This is to advise that a new version of the Warranty "Operation Code Manual" has been loaded to the MMAL Portal.

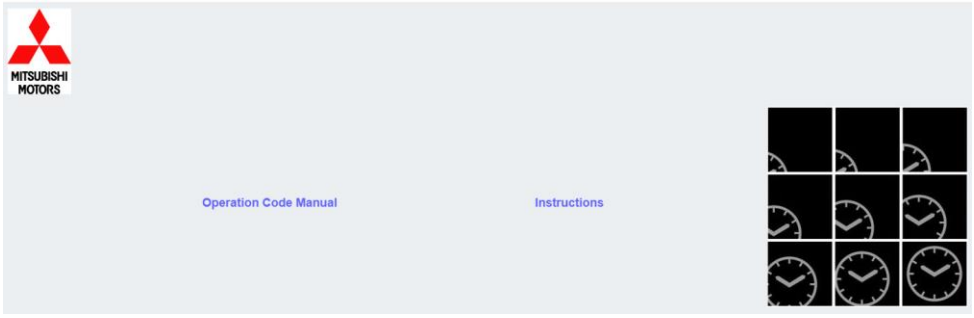

The "Operation Code Manual" contains Labour Operation Times for the latest models EXCEPT Express. Express labour operation times are available separately in WIB-2021-03.

Please use the "Operation Code Manual" in the preparation of warranty claims.
This will ensure the correct Quality Position Code and Labour Operations are recorded for the repair performed.

Using this manual correctly will prove to be an invaluable aid for properly handling warranty claims and in accurately estimating repair costs.

Access to the manual is via the path My Work > Service > Warranty Operations.
Select "Operation Code Manual" from the menu and the manual will display (image below right).

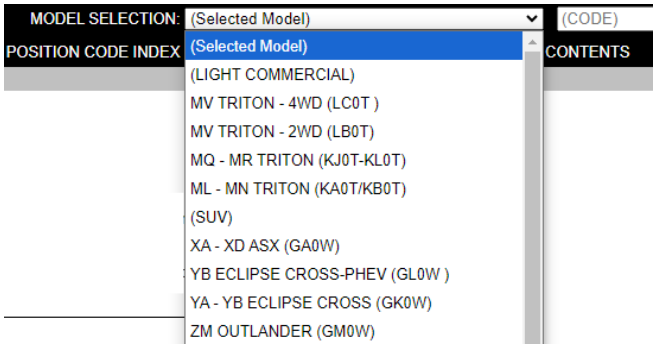

Selecting "Instructions" provides comprehensive information on the use of the manual.

Selecting "Operation Code Manual" provides access to the GROUP, ILLUSTRATION, TEXT, and POSITION CODE INDEX's.

**Please note:**
1: The information contained in this document is CONFIDENTIAL and intended for Mitsubishi Dealer use only. It must not be provided to third parties.
2: This WIB forms part of the Warranty Procedure Manual

To access the INDEX lists, Model selection via the drop-down list, is required.

While all INDEX's will provide access to the Labour Operation Codes, the POSITION CODE INDEX contains the most comprehensive information.

The POSITION CODE INDEX will allow easy selection of the position code that most accurately identifies the part that caused the failure AND the labour operation code(s) that relate to the work performed to undertake the repair.
**Note**: The position code and the labour operation codes can and may be different

**Hotline fixes, must use the coding as prescribed in the Hotline Fix document.**

**Quick Tip:** Ctrl+F will allow you to search the "Operation Code Manual" using a keyword.

Yours sincerely,

**Fiona Lamond**
**Warranty Administration Manager**
