Applicable model(s)	All		
Notice Category	**Claim Submission**	MMAL Reference	**WIB2025-04**
Service Group	00 General	Issue Date	28/04/2025
Claim Type	All	Effective Date	06/05/2025

Attention

Fixed Operations Managers, Service Managers & Advisors, All Service & Warranty Personnel

Overview

Changes have been made to the claim data entry process.
During Claim creation, at Step 3. "Details", some claim types now require the entry of the Causal Part before entry of the Quality Coding becomes available.

The Causal Part will be used to refine the list of position codes offered for use as the Quality Position Code.
If the Causal Part is changed, the Quality Position Code will be cleared.
In the Claim Detail screen the Quality Position Code will also be cleared if the Causal Part originally selected is changed.

Claim Requirements

- The Cause Part Number is used on Service Claims to identify the part that failed and made the repair necessary.
  It is important that the Cause Part Number identifies the part that has caused the problem.

- At Step 3 "Detail" during claim creation, enter the part number for the part that is believed to be the cause of the failure in the "Causal Part" field

- Once the Causal Part is entered, select the "Position Code" field and select from the list of position codes displayed.

- It is important that regardless of which parts are replaced, **the part number of the part that caused the failure should be entered**

  a. In the situation where the failure is caused by a sub-component within an assembly and a complete assembly is used to rectify the vehicle, where the cause of failure is known the sub-component part number should be entered and nominated as the Causal Part number.

  b. Where a part is removed, repaired and the original part is refitted this can still be entered on the claim and notated as the Causal Part.

In case of a. or b. above, once the claim is "created" the "box" adjacent to the Cause Part icon should also be checked. This will allow the part to be included on the claim without recording a part cost.

Service Group	00 General	Issue Date	28/04/2025
Claim Type	All	Effective Date	06/05/2025

- Once the claim is created, the Causal Part icon will be activated, and the Causal Part line will highlight green automatically on the claim detail screen.
- The Causal Part and/or Quality Coding can be updated on the claim detail screen if required.
- If no applicable position code is displayed, you can search the Position Code catalogue MANUALLY. **This should be done in conjunction with the Operation Code Manual to ensure correct code selection**.

If you find you are consistently overriding the position codes offered, please contact MMAL Warranty Administration by MDA and advise the Causal Part Number and the Position Code you are selecting so we can review the selections.

- Where a Miscellaneous Part is nominated as a causal part e.g. XAUDIO, a manual Position code search will be required.

Reference Information

Refer to the attached "Claim Submission Process" document for additional information.

Refer to the relevant sections in the WPPM and SPM (available on the MMAL portal) for more information on Claim submission, Quality coding and recording "REPAIRED" parts.

The Operation Code Manual is available on the MMAL Portal. Refer "Instructions" for how to use the Manual ("Instructions" can also be accessed from "Other Contents" drop down)

Quick Tip

Ctrl+F will allow you to search the any of the above Manuals using a key word.

Abbreviations

MDA – Mi Dealer Assist
SPM - Service Procedure Manual
WPPM - Warranty Policies & Procedures Manual

Yours sincerely,

Fiona Lamond
Warranty Administration Manager
